List of figures	xvii
List of tables.....	xix
About the authors	xxi
Foreword by Prof. M. Afzal Zargar.....	xxiii
Foreword by Prof. Nazir A. Ganai	xxv
Introduction.....	xxvii
 CHAPTER 1 Calculations of molarity and normality.....	1
Molarity (M).....	1
Normality (N).....	2
Relation between molarity and normality.....	2
Observations and result.....	3
 CHAPTER 2 Glassware washing and sterilization techniques	5
Principle	5
Cleaning of Glasswares by chromic acid.....	5
Washing of glasswares is done by two main methods.....	5
General procedure for cleaning of glasswares by detergent	5
General procedure for cleaning of glasswares by chromic acid.....	6
Preparation of 5% chromic acid.....	6
Cleaning by chromic acid.....	6
Types of sterilization.....	6
Observation and results.....	7
 CHAPTER 3 pH meter: its use and calibration.....	9
Structure	9
Calibration	9
Observation and result.....	10
 CHAPTER 4 Principle and working of autoclave	11
Conditions for autoclave sterilization	12
Procedure for operating an autoclave	13
Autoclave pressure and temperature chart.....	13
Application of autoclave	14
 CHAPTER 5 Principle and working of centrifuge.....	15
Rate of sedimentation.....	15
Sedimentation time	16
Parts of centrifuge.....	16
Relative centrifugal force.....	17
Types of centrifuges.....	18

Type of centrifugations	19
Centrifugation	19
Uses of centrifuge	20
CHAPTER 6 Principle and working of laminar	21
Parts of a laminar air flow chamber	21
Advantages of a laminar air flow chamber	24
Disadvantages of a laminar air flow chamber	24
Applications of a laminar air flow chamber	24
When employing a laminar air flow chamber, there are a few things to keep in mind	25
CHAPTER 7 Estimation of total cholesterol (Flegg, 1972)	27
Materials and equipment (materials and reagents)	28
Step-by-step method details (experimental procedure)	28
Procedure	28
Expected outcomes	29
Estimation of HDL—cholesterol	29
Materials and equipment (materials and reagents)	29
Step-by-step method details (experimental procedure)	30
It involves two steps	30
Expected outcomes	30
Estimation of LDL cholesterol	30
Estimation of VLDL cholesterol	31
Materials and equipment (materials and reagents)	31
Step-by-step method details (experimental procedure)	32
Procedure	32
Expected outcomes	32
Advantages	32
Limitations	32
Safety considerations and standards	33
References	33
CHAPTER 8 Estimation of creatinine	35
Materials and equipment (materials and reagents)	35
Step-by-step method details (experimental procedure)	36
Procedure	36
Expected outcomes	36
Advantages	37
Limitations	37
Safety considerations and standards	37
Alternative methods/procedures	37

CHAPTER 9 Estimation of blood urea	39
Materials and equipment.....	39
Step-by-step method details	40
Procedure	40
Expected outcomes	40
Advantages.....	40
Limitations.....	41
Safety considerations and standards	41
Alternative methods/procedures.....	41
CHAPTER 10 Estimation of blood glucose by GOD—POD method	43
Materials and equipment (materials and reagents)	44
Step-by-step method details (experimental procedure).....	44
Procedure	44
Expected outcomes	44
Normal range blood.....	44
Advantages.....	45
Limitations.....	45
Safety considerations and standards	45
Alternative methods/procedures.....	45
Reference.....	45
CHAPTER 11 Determination of albumin and globulin in plasma..	47
Materials and equipment (materials and reagents)	47
Step-by-step method details.....	47
Calculations.....	48
CHAPTER 12 Quantitative determination of homocysteine	49
Materials and equipment (materials and reagents)	49
Step-by-step method details (experimental procedure).....	50
Procedure	50
Expected outcomes	51
Advantages.....	51
Limitations.....	51
Safety considerations and standards	52
CHAPTER 13 Estimation of serum bilirubin.....	53
Reagents required	53
Materials required.....	54
Reagent preparation	54
Assay procedure.....	54

Total bilirubin end point (bichromate)	54
Assay procedure.....	54
Direct bilirubin end point (bichromatic).....	54
Reference.....	56
CHAPTER 14 Estimation of diagnostic enzyme ALT	57
Reagents	57
Components and concentrations	57
Materials required.....	58
Reagent preparation.....	58
One reagent procedure.....	58
Specimen	58
Assay procedure.....	58
Two reagent procedure	58
Sample/control	59
Assay procedure 2	59
One reagent procedure.....	59
Sample/control.....	59
Calculations.....	59
Quality control.....	59
Performance characteristics	60
Temperature conversion factors	60
CHAPTER 15 Estimation of diagnostic enzyme AST.....	61
Reagents	62
Components and concentrations	62
Materials required.....	62
Reagent preparation.....	62
One reagent procedure.....	62
Specimen	62
Assay procedure.....	63
Sample/control.....	63
Assay procedure 2	63
One reagent procedure.....	63
Sample/control.....	63
Calculations.....	64
Quality control.....	64
Performance characteristics	64
CHAPTER 16 Protein estimation by Lowry's method	65
Materials and equipment (materials and reagents)	65
Step-by-step method details (experimental procedure).....	66

Procedure.....	66
Expected outcomes	66
Advantages.....	66
Limitations.....	67
Safety considerations and standards	67
Alternative methods/procedures.....	67
CHAPTER 17 Estimation of reducing sugar by using dinitro salicylic acid method.....	69
Materials and equipment (materials and reagents)	69
Step-by-step method details (experimental procedure).....	70
Procedure.....	70
Expected outcomes	72
Advantages.....	72
Limitations.....	72
Safety considerations and standards	72
Alternative methods/procedures.....	73
CHAPTER 18 To perform quantitative determination of total protein in serum/plasma.....	75
Materials and equipment (materials and reagents)	75
Step-by-step method details (experimental procedure).....	76
Procedure.....	76
Expected outcomes	76
Advantages.....	76
Limitations.....	77
Safety considerations and standards	77
Alternative methods/procedures.....	77
CHAPTER 19 Enzyme activity using starch assay.....	79
Requirements.....	79
Preparation.....	80
Procedure.....	80
Observation and result.....	80
Determination of enzyme activity.....	81
CHAPTER 20 To estimate protein by Bradford assay	83
Materials and equipment (materials and reagents)	83
Bradford reagent preparation	84
Step-by-step method details (experimental procedure).....	84
Procedure.....	84
Expected outcomes	84

Result.....	84
Advantages.....	84
Limitations.....	85
Safety considerations and standards	85
CHAPTER 21 To identify a protein sample using SDS-PAGE.....	87
Materials and equipment (materials and reagents)	88
Step-by-step method details (experimental procedure).....	89
Procedure.....	89
Expected outcomes	91
Advantages.....	91
Limitations.....	91
Safety considerations and standards	91
CHAPTER 22 Genomic DNA isolation from whole blood.....	93
Principle	93
Materials and equipment (materials and reagents)	94
Step-by-step method details (experimental procedure).....	95
Procedure.....	95
Expected outcomes	96
Advantages.....	96
Limitations.....	96
Safety considerations and standards	97
Reference.....	97
CHAPTER 23 PCR for gene amplification.....	99
Materials and equipment.....	99
Procedure.....	100
Notes.....	101
Expected outcomes	101
Advantages.....	101
Limitations.....	101
Safety considerations and standards	102
CHAPTER 24 Agarose gel electrophoresis.....	103
Materials and equipment (materials and reagents)	103
Step-by-step method details (experimental procedure).....	104
Procedure.....	104
Expected outcomes	105
Advantages.....	105
Limitations.....	105
Safety considerations and standards	106

CHAPTER 25	RNA isolation from human tissue	107
	Some important precautions	107
	Requirements	108
	Protocol	108
	Optimized protocol for the extraction of RNA isolation from blood.....	109
	Reference	109
CHAPTER 26	Real-time polymerase chain reaction.....	111
	Types of real-time quantification	112
	Absolute quantitation	112
	Relative quantitation	112
	Materials and equipment.....	113
	Step-by-step method details.....	113
	Procedure.....	113
	Reverse transcription.....	113
	Relative gene expression studies.....	114
	Expected outcomes	115
	Advantages.....	115
	Limitations.....	115
	Safety considerations and standards	115
	References.....	115
CHAPTER 27	Preparation of competent cells by CaCl_2 treatment.....	117
	Principle	117
	Materials required.....	117
	Equipment.....	118
	Principle	118
	Preparation of media or solution.....	118
	Procedure.....	118
	Overnight culture.....	118
	Generation of competent cells.....	119
	CaCl_2 wash.....	119
	Materials and equipment.....	119
	Methods.....	119
	Heat shock transformation of <i>Escherichia coli</i>	120
	Materials and equipment.....	120
	Methods.....	120
	Heat shock	120

CHAPTER 28 RNA isolation from plant tissues	123
DNase treatment.....	124
cDNA synthesis.....	124
Reference.....	125
CHAPTER 29 DNA isolation from the bacterial culture broth....	127
Materials and equipment (materials and reagents)	128
Step-by-step method details (experimental procedure).....	129
Procedure.....	129
Expected outcomes	129
Advantages.....	130
Limitations	130
Safety considerations and standards	130
CHAPTER 30 DNA isolation from fungal mycelium	131
Introduction.....	131
Procedure or steps.....	131
Precautions.....	132
CHAPTER 31 Quantification of the DNA using spectrophotometer	133
Materials and equipment (materials and reagents)	134
Step-by-step method details (experimental procedure).....	134
Procedure.....	134
Expected outcomes	134
DNA quantification.....	134
Advantages.....	135
Limitations	135
Safety considerations and standards	135
CHAPTER 32 Formaldehyde gel electrophoresis of the isolated RNA sample	137
Materials and equipment (materials and reagents)	137
Step-by-step method details (experimental procedure).....	138
Procedure.....	138
Expected outcomes	138
Advantages.....	139
Limitations.....	139
Safety considerations and standards	139
CHAPTER 33 Paper chromatography of different amino acid	141
Materials required for setup of technique.....	141
Experimental procedure.....	142

Biosafety considerations and laboratory standards	143
The experimental outcome	143
Advantages.....	143
Limitations.....	143
CHAPTER 34 Separation of plant pigments using column chromatography	145
Basic principle behind separation of biomolecules.....	145
Materials and equipment (materials and reagents)	145
Chemical solutions used for column chromatography.....	146
Step-by-step procedure	146
Expected outcomes	146
Advantages of column chromatography	147
Main limitations	147
Safety concerns and experimental standards	147
Alternative methods/procedures.....	147
CHAPTER 35 Separation of plant pigment by thin-layer chromatography	149
Materials required.....	149
Reagents	150
Procedure.....	150
Observation and results.....	150
CHAPTER 36 Chromatin immunoprecipitation protocol.....	153
Materials.....	154
Procedure.....	154
Precautions.....	155
Further reading.....	156
CHAPTER 37 Types of media	157
CHAPTER 38 Preparation of nutrient agar media	159
Principle	159
Materials and equipment (materials and reagents)	160
Nutrient agar medium standard composition (1000 mL)	160
Step-by-step method details (experimental procedure).....	160
Procedure	160
Expected outcomes	160
Advantages.....	161
Limitations.....	161
Safety considerations and standards	162

CHAPTER 39 Serial dilution of the bacterial cells	163
Materials and equipment (materials and reagents)	163
Step-by-step method details (experimental procedure).....	164
Procedure.....	164
Advantages.....	164
Limitations.....	164
Safety considerations and standards	164
CHAPTER 40 Spread plate method of the bacterial cells.....	167
Materials and equipment (materials and reagents)	167
Step-by-step method details (experimental procedure).....	167
Procedure.....	167
Expected outcomes	168
Advantages.....	168
Limitations.....	168
Safety considerations and standards	168
CHAPTER 41 Streak plate method.....	171
Materials and equipment (materials and reagents)	171
Step-by-step method details (experimental procedure).....	172
Procedure.....	172
Expected outcomes	172
Advantages.....	172
Limitations.....	172
Safety considerations and standards	173
CHAPTER 42 Identified bacterial colony in culture broth	175
Materials and equipment (materials and reagents)	175
Step-by-step method details (experimental procedure).....	175
Procedure.....	175
Expected outcomes	176
Advantages.....	176
Limitations.....	176
Safety considerations and standards	176
CHAPTER 43 Pour plate method for bacterial colony counting .	177
Materials and equipment (materials and reagents)	177
Step-by-step method details (experimental procedure).....	178
Procedure.....	178
Expected outcomes	178
Advantages.....	178
Limitations.....	178
Safety considerations and standards	179

CHAPTER 44 Gram staining of bacteria	181
Materials and equipment (materials and reagents)	181
Step-by-step method details (experimental procedure).....	182
Procedure.....	182
Expected outcomes	182
Advantages.....	182
Limitations.....	182
Safety considerations and standards	183
CHAPTER 45 Casein hydrolysis test.....	185
Materials and equipment (materials and reagents)	185
Step-by-step method details (experimental procedure).....	186
Procedure.....	186
Expected outcomes	186
Advantages.....	186
Limitations.....	186
Safety considerations and standards	186
CHAPTER 46 Antibiotic resistance test by agar well diffusion method	189
Materials and equipment (materials and reagents)	189
Step-by-step method details (experimental procedure).....	190
Procedure.....	190
Expected outcomes	190
Advantages.....	191
Limitations.....	191
Index.....	193
