

The background of the book cover is a photograph of a wetland. In the foreground, there is a pond with several lily pads, some of which are green and others are yellowing. Tall grasses are visible along the edges of the pond. In the background, a dense forest of tall, thin trees stands under a clear blue sky.

The Biology of Aquatic and Wetland Plants

Contents

Preface.....	xiii
About the Author	xvii
Chapter 1 Overview	1
1.1 Importance of Aquatic and Wetland Plants.....	1
1.2 What This Book Is About.....	1
1.2.1 Wetland Habitats Defined	4
1.2.2 Aquatic and Wetland Plants Defined	5
1.3 Growth Forms and Zonation of Aquatic and Wetland Plants	6
1.3.1 Overview of Plant Anatomy.....	6
1.3.2 Emergent Plants.....	10
1.3.3 Floating-Leafed Plants	10
1.3.4 Submersed Plants	10
1.3.5 Free-Floating Plants	14
1.3.6 A Few Exceptions to the Earlier Classification.....	14
1.3.7 Zonation	15
1.4 In Summary	16
1.5 For Review.....	16
1.6 References.....	16
Chapter 2 Evolutionary Relationships among Aquatic and Wetland Plants.....	19
2.1 Why Evolutionary History Is Important	19
2.1.1 The Disorderliness of Taxonomic Organization	19
2.1.2 Reconstructing Evolutionary Trees	21
2.2 The Green Plants as a Starting Point.....	26
2.2.1 Charophytes.....	26
2.2.2 Early Diverging Embryophytes—the Bryophyta.....	26
2.2.3 Non-Angiosperm Tracheophytes.....	27
2.3 Evolution and Diversification of the Angiosperms.....	35
2.3.1 Nymphaeales	36
2.3.2 Monocots.....	41
2.3.3 Magnoliidae.....	42
2.3.4 Ceratophyllales	42
2.3.5 Eudicots.....	44
2.4 Truly Aquatic Plants.....	45
2.5 Taxonomic Diversity of Mangrove Species.....	46
2.6 In Summary	47
2.7 For Review.....	54
2.8 References.....	55
Chapter 3 Wetland Ecosystems and Plant Diversity	59
3.1 Major Wetland Types.....	59
3.2 Global Tour of Wetlands and Plant Diversity	61
3.2.1 The Pantanal, Brazil.....	64
3.2.1.1 Noteworthy Threats.....	66
3.2.1.2 Representative Plant Species	66
3.2.2 The Iberá Wetlands, Argentina	66
3.2.2.1 Noteworthy Threats.....	66
3.2.2.2 Representative Plant Species	67

3.2.3	Congo River Swamps, Republic of the Congo and Democratic Republic of the Congo	69
3.2.3.1	Noteworthy Threats	71
3.2.3.2	Representative Plant Species	71
3.2.4	Okavango Delta, Botswana	71
3.2.4.1	Noteworthy Threats	73
3.2.4.2	Representative Plant Species	74
3.2.5	Kakadu Wetlands, Australia.....	74
3.2.5.1	Noteworthy Threats	74
3.2.5.2	Representative Plant Species	74
3.2.6	Whangamarino Wetland, New Zealand.....	74
3.2.6.1	Noteworthy Threats	76
3.2.6.2	Representative Plant Species	77
3.2.7	The Sundarbans, India and Bangladesh.....	77
3.2.7.1	Noteworthy Threats	79
3.2.7.2	Representative Plant Species	79
3.2.8	Qinghai-Tibet Plateau Wetlands, China.....	80
3.2.8.1	Noteworthy Threats	80
3.2.8.2	Representative Plant Species	80
3.2.9	Kolkheti Lowlands, Georgia	80
3.2.9.1	Noteworthy Threats	82
3.2.9.2	Representative Plant Species	82
3.2.10	Dofiana National Park, Spain.....	82
3.2.10.1	Noteworthy Threats	83
3.2.10.2	Representative Plant Species	84
3.2.11	Boreal Peatlands, Canada.....	84
3.2.11.1	Noteworthy Threats	85
3.2.11.2	Representative Plant Species	85
3.2.12	The Everglades, Florida, United States.....	85
3.2.12.1	Noteworthy Threats	86
3.2.12.2	Representative Plant Species	87
3.2.13	Bottomland Forests, Mississippi, United States.....	88
3.2.13.1	Noteworthy Threats	90
3.2.13.2	Representative Plant Species	90
3.3	Global Patterns of Wetland Plant Diversity.....	90
3.4	Global Threats to Wetland Integrity.....	92
3.5	In Summary.....	93
3.6	For Review.....	93
3.7	References.....	93

Chapter 4	Hydrology	97
4.1	Overview of Wetland Hydrology.....	97
4.2	Quantifying Hydrology with a Hydrologic Budget	98
4.2.1	Precipitation and Interception	99
4.2.2	Overland Flows	100
4.2.3	Soil Water Flow and Groundwater Flow	103
4.2.3.1	Interaction of Vegetation and Subsurface Hydrology in an Irish Bog.....	105
4.2.3.2	Interaction of Vegetation and Subsurface Hydrology in a Great Lakes Coastal Fen	107
4.2.4	Evapotranspiration	109
4.2.4.1	Interaction of Vegetation and Hydrology in a Riparian Wetland in Alabama (USA).....	112
4.2.5	Change in Storage	114
4.2.6	Hydroperiod Integrates the Hydrology across Time.....	115
4.3	In Summary.....	119
4.4	For Review.....	119
4.5	References.....	119

Chapter 5	Critical Features of the Aquatic Environment	121
5.1	Key Features of Water as a Medium for Plant Life.....	121
5.1.1	Temperature and Density Relations of Water.....	123
5.1.2	Water as a Solvent	123
5.2	Patterns of Light Availability	125
5.2.1	Influence of Water on Light.....	126
5.2.2	Influence of Dissolved and Suspended Materials on Light.....	128
5.3	Carbon Dioxide Availability in the Water	130
5.4	Oxygen Availability in the Water and Sediments	133
5.4.1	Patterns of Oxygen in the Water and Sediments	133
5.4.2	Redox Chemistry.....	135
5.4.3	Anaerobic Microbial Metabolism	137
5.5	In Summary.....	139
5.6	For Review.....	140
5.7	References.....	140
Chapter 6	Adaptations for Life in the Aquatic Environment.....	143
6.1	Critical Limitations for Life in the Water.....	143
6.2	Anaerobic/Hypoxic Physiology	143
6.2.1	“Energy Crisis” Metabolism	143
6.2.2	Ethylene Production and Signaling	145
6.3	Aerenchyma.....	146
6.4	Aeration Systems.....	153
6.4.1	Aeration via Positive Pressure.....	154
6.4.2	Aeration via Negative Pressure	157
6.5	Radial Oxygen Loss	159
6.6	Root Adaptations	161
6.7	Rapid Shoot Elongation.....	161
6.8	Heterophylly	164
6.8.1	Factors Influencing Heterophylly	165
6.8.2	Benefits of Heterophylly	168
6.9	Modifications to Photosynthetic Metabolism.....	169
6.9.1	C ₄ Photosynthesis	171
6.9.2	CAM or AAM Photosynthesis	173
6.9.3	Use of Bicarbonate	174
6.9.4	Switching among Photosynthetic Pathways and Intermediate Phenotypes	175
6.10	In Summary.....	176
6.11	For Review.....	177
6.12	References.....	178
Chapter 7	Plant Nutrition and Sediment Biogeochemistry	183
7.1	Plant Nutrition	183
7.2	Carbon, Hydrogen, and Oxygen as Essential Nutrients	183
7.3	Methanogenesis and the Carbon Cycle	185
7.4	Soil Macronutrients	187
7.4.1	Nitrogen.....	189
7.4.1.1	Nitrogen Transformations in Wetland Soil.....	189
7.4.2	Phosphorus	191
7.4.3	Other Soil Macronutrients.....	194
7.5	Soil Micronutrients.....	195
7.5.1	Influence of Redox Chemistry on Iron and Manganese.....	196
7.5.2	Other Soil Micronutrients	196
7.6	Plant Adaptations for Nutrient Access	197
7.6.1	Nitrogen-Fixing Symbionts.....	197

7.6.1.1	Cyanobacteria.....	197
7.6.1.2	Rhizobia.....	198
7.6.1.3	<i>Frankia</i>	200
7.6.2	Mycorrhizae.....	201
7.6.3	Carnivorous Plants.....	203
7.7	In Summary.....	209
7.8	For Review.....	210
7.9	References.....	210

Chapter 8 Reproduction.....215

8.1	Plant Reproduction in the Context of Life History.....	215
8.2	Sexual Reproduction in Plants.....	215
8.2.1	Points of Potential Modification.....	222
8.2.2	Pollination within Closed Flowers—Cleistogamy.....	223
8.2.3	Pollination of Open Flowers.....	223
8.2.3.1	Self-Pollination within Open Flowers—Autogamy.....	224
8.2.3.2	Self-Pollination between Open Flowers—Geitonogamy.....	226
8.2.3.3	Pollination by Animals.....	227
8.2.3.4	Pollination by Wind.....	230
8.2.3.5	Pollination by Water.....	231
8.2.3.6	Pollination above the Water Surface.....	231
8.2.3.7	Pollination on the Water Surface.....	232
8.2.3.8	Pollination below the Water Surface.....	234
8.2.4	Compatibility, Inbreeding, and Inbreeding Avoidance.....	236
8.2.5	Fruit and Seed Development and Dispersal.....	239
8.2.6	Dormancy and Germination.....	241
8.2.7	Regeneration Niche.....	246
8.3	Clonal Propagation in Aquatic and Wetland Plants.....	248
8.3.1	Multiple Functionality of Asexual Propagules.....	248
8.3.2	Types of Asexual Propagules.....	249
8.3.2.1	Modified Buds.....	252
8.3.2.2	Shoot Fragments.....	253
8.3.2.3	Modified Shoots.....	254
8.3.2.4	Modified Shoot Bases.....	255
8.3.2.5	Modified Roots.....	255
8.4	Balancing Sexual versus Asexual Reproduction.....	256
8.5	In Summary.....	261
8.6	For Review.....	262
8.7	References.....	262

Chapter 9 Population Biology and Evolutionary Ecology.....267

9.1	Population Biology in the Context of Evolution.....	267
9.2	Population Biology.....	267
9.2.1	Density-Independent Population Growth.....	268
9.2.2	Density-Dependent Population Growth.....	269
9.2.3	Age- or Stage-Based Approaches.....	271
9.3	Metapopulations: Populations of Populations.....	274
9.4	Metapopulations, Local Adaptation, and Speciation.....	279
9.4.1	Mechanisms of Divergence.....	283
9.4.2	Examples from Aquatic and Wetland Ecosystems.....	284
9.5	Evolutionary Ecology.....	286
9.5.1	Conservation Genetics.....	287
9.5.2	Hybridization.....	289
9.6	In Summary.....	292
9.7	For Review.....	293
9.8	References.....	293

Chapter 10	Species Interactions.....	297
10.1	Interactions in the Context of Life History	297
10.2	Competition (– –)	302
10.2.1	A Formal Construct for Studying Competition.....	302
10.2.2	Quantifying Competition	305
10.2.2.1	Design of the Experiment.....	305
10.2.2.2	Measuring Plant Performance	307
10.2.2.3	Quantifying Competition.....	310
10.3	Amensalism (– 0)	312
10.4	Allelopathy in Aquatic and Wetland Plants	314
10.4.1	Interplay between Allelopathy and Competition	316
10.4.2	Quantifying Allelopathy in Wetlands	318
10.5	Commensalism (+ 0).....	318
10.6	Exploitative Interactions (– +)	322
10.6.1	Herbivory.....	322
10.6.1.1	Herbivores in Wetlands.....	323
10.6.1.2	Importance of Herbivory	323
10.6.1.3	Chemical Defenses against Herbivory.....	326
10.6.1.4	Herbivory and Biological Control.....	328
10.6.2	Parasites and Pathogens of Aquatic and Wetland Plants	328
10.7	In Summary	333
10.8	For Review.....	334
10.9	References.....	334
Chapter 11	Plants in the Context of Wetland Ecosystems.....	339
11.1	Putting It All Together.....	339
11.2	Succession.....	339
11.3	Disturbance.....	349
11.4	Mitigation of Eutrophication by Wetland Plants	350
11.5	Climate Change and Wetland Carbon Storage.....	352
11.6	Closing Thoughts.....	357
11.7	In Summary	357
11.8	For Review.....	358
11.9	References.....	358
