<b>Preface</b>	<b>ix</b>
<b>1 Introduction to Deep Learning</b>	<b>1</b>
1.1 History of Deep Learning	1
1.2 A Probabilistic Theory of Deep Learning	4
1.3 Back Propagation and Regularization	14
1.4 Batch Normalization and VC Dimension	17
1.5 Neural Nets—Deep and Shallow Networks	18
1.6 Supervised and Semi-Supervised Learning	19
1.7 Deep Learning and Reinforcement Learning	21
References	22
<b>2 Basics of TensorFlow</b>	<b>25</b>
2.1 Tensors	25
2.2 Computational Graph and Session	27
2.3 Constants, Placeholders, and Variables	28
2.4 Creating Tensor	32
2.5 Working on Matrices	35
2.6 Activation Functions	36
2.7 Loss Functions	39
2.8 Common Loss Function	39
2.9 Optimizers	40
2.10 Metrics	41
References	42
<b>3 Understanding and Working with Keras</b>	<b>45</b>
3.1 Major Steps to Deep Learning Models	45
3.2 Load Data	47
3.3 Pre-Process Data	48
3.4 Define the Model	48
3.5 Compile the Model	49
3.6 Fit and Evaluate the Mode	51

3.7	Prediction	52
3.8	Save and Reload the Model	52
3.9	Additional Steps to Improve Keras Models	53
3.10	Keras with TensorFlow	55
	References	56
<b>4</b>	<b>Multilayer Perceptron</b>	<b>57</b>
4.1	Artificial Neural Network	57
4.2	Single-Layer Perceptron	60
4.3	Multilayer Perceptron	61
4.4	Logistic Regression Model	61
4.5	Regression to MLP in TensorFlow	63
4.6	TensorFlow Steps to Build Models	63
4.7	Linear Regression in TensorFlow	63
4.8	Logistic Regression Mode in TensorFlow	67
4.9	Multilayer Perceptron in TensorFlow	69
4.10	Regression to MLP in Keras	72
4.11	Log-Linear Model	72
4.12	Keras Neural Network for Linear Regression	73
4.13	Keras Neural Network for Logistic Regression	73
4.14	MLPs on the Iris Data	75
4.15	MLPs on MNIST Data (Digit Classification)	76
4.16	MLPs on Randomly Generated Data	78
	References	79
<b>5</b>	<b>Convolutional Neural Networks in Tensorflow</b>	<b>81</b>
5.1	CNN Architectures	81
5.2	Properties of CNN Representations	82
5.3	Convolution Layers, Pooling Layers – Strides - Padding and Fully Connected Layer	82
5.4	Why TensorFlow for CNN Models?	84
5.5	TensorFlow Code for Building an Image Classifier for MNIST Data	84
5.6	Using a High-Level API for Building CNN Models	88
5.7	CNN in Keras	88
5.8	Building an Image Classifier for MNIST Data in Keras	88
5.9	Building an Image Classifier with CIFAR-10 Data	89
5.10	Define the Model Architecture	90
5.11	Pre-Trained Models	91
	References	93

<b>6</b>	<b>RNN and LSTM</b>	<b>95</b>
6.1	Concept of RNN	95
6.2	Concept of LSTM	96
6.3	Modes of LSTM	97
6.4	Sequence Prediction	98
6.5	Time-Series Forecasting with the LSTM Model	99
6.6	Speech to Text	100
6.7	Examples Using Each API	102
6.8	Text-to-Speech Conversion	105
6.9	Cognitive Service Providers	106
6.10	The Future of Speech Analytics	107
	References	107
<b>7</b>	<b>Developing Chatbot's Face Detection and Recognition</b>	<b>109</b>
7.1	Why Chatbots?	109
7.2	Designs and Functions of Chatbot's	109
7.3	Steps for Building a Chatbot's	110
7.4	Best Practices of Chatbot Development	116
7.5	Face Detection	116
7.6	Face Recognition	117
7.7	Face Analysis	117
7.8	OpenCV—Detecting a Face, Recognition and Face Analysis	117
	7.8.1 Face Detection	117
	7.8.2 Face Recognition	120
7.9	Deep Learning–Based Face Recognition	124
7.10	Transfer Learning	127
7.11	API's	131
	References	132
<b>8</b>	<b>Advanced Deep Learning</b>	<b>133</b>
8.1	Deep Convolutional Neural Networks (AlexNet)	133
8.2	Networks Using Blocks (VGG)	137
8.3	Network in Network (NiN)	140
8.4	Networks with Parallel Concatenations (GoogLeNet)	144
8.5	Residual Networks (ResNet)	148
8.6	Densely Connected Networks (DenseNet)	151
8.7	Gated Recurrent Units (GRU)	154
8.8	Long Short-Term Memory (LSTM)	156
8.9	Deep Recurrent Neural Networks (D-RNN)	158
8.10	Bidirectional Recurrent Neural Networks (Bi-RNN)	159

8.11	Machine Translation and the Dataset	160
8.12	Sequence to Sequence Learning	161
	References	164
<b>9</b>	<b>Enhanced Convolutional Neural Network</b>	<b>167</b>
9.1	Introduction	167
9.2	Deep Learning-Based Architecture for Absence Seizure Detection	178
9.3	EEG Signal Pre-Processing Strategy and Channel Selection	180
9.4	Input Formulation and Augmentation of EEG Signal for Deep Learning Model	188
9.5	Deep Learning Based Feature Extraction and Classification	196
9.6	Performance Analysis	200
9.7	Summary	201
	References	202
<b>10</b>	<b>Conclusion</b>	<b>205</b>
10.1	Introduction	205
10.2	Future Research Direction and Prospects	205
10.3	Research Challenges in Deep Learning	210
10.4	Practical Deep Learning Case Studies	210
	10.4.1 Medicine: Epilepsy Seizure Onset Prediction	219
	10.4.2 Using Data from Test Drills to Predict where to Drill for Oil	232
10.5	Summary	235
	References	235
	<b>Index</b>	<b>239</b>
