Contents

<i>Foreword by Yi Pan</i>	vii
<i>Foreword by Jeng-Shyang Pan</i>	ix
<i>Preface</i>	xi
<i>About the Author</i>	xv
<i>Acknowledgments</i>	xvii
Chapter 1 What is IoT on Earth	1
1.1 Smart Coffee Pot	1
1.2 Implanted Tags	3
1.3 Electronic Toll Collection	5
1.4 Enlightens	6
Chapter 2 Development of Internet of Things	11
2.1 Formation of IoT Concepts	12
2.2 IoT and Human Society	15
2.2.1 Population and connected devices	15
2.2.2 Reflection on the unity of nature and human	18
2.2.3 IoT and sustainable development	19
2.3 Definition of the IoT at This Stage	21
2.4 Understanding IoE	25
2.4.1 IoE pyramid	25
2.4.2 IoT 2.0	28
2.5 Summary	32

Chapter 3	Characteristics of Internet of Things	33
3.1	Architecture of Internet of Things and Beyond	33
3.2	From Multi-Layers Technical Vision	43
3.3	Internet of Everything and Characteristics	49
3.3.1	IoT and Internet of Everything	49
3.3.2	Analysis of the characteristics towards IoE	50
3.4	Value Chain Towards an New Ecosystem	55
Chapter 4	Perceptual Technologies Layer of IoT	59
4.1	Identification and Recognition Technology	60
4.1.1	Automatic recognition technology	60
4.1.2	RFID	63
4.1.3	EPC system	72
4.1.4	The analysis of EPC security	82
4.2.	Sensors and WSN	99
4.2.1	Introduction of sensor	100
4.2.2	Sensors and WSN	102
4.2.3	Novel sensor system and smart applications	107
4.2.4	Sensing technology and application	110
4.2.5	Sensing use case in AGV navigation	115
4.2.6	Security analysis of WSN	118
4.3	Biometric Identification Technology	118
4.3.1	Introduction to biometrics	121
4.3.2	Fingerprint and palm print recognition	124
4.3.3	Facial recognition	127
4.3.4	Eye and iris recognition	130
4.3.5	Behavior recognition and secure consideration	132
4.4	Interaction of H2M and IoT Senses (IoTS)	133
4.4.1	Touch	135
4.4.2	Sight of IoT	139
4.4.3	Auditory sense	146
4.4.4	Smell and taste	148
4.4.5	VR and AR	153
4.4.6	Sense of space	156
4.5	Location Awareness	158
4.5.1	GNSS and INS	159
4.5.2	Positioning in cellular network and assisted GPS	163
4.5.3	Node localization	167
4.5.4	Indoor positioning and beacon	169

4.5.5 Wi-Fi fingerprint and IMES	173
4.6 AI-related Sensing and Location	175
4.6.1 Machine vision	176
4.6.2 SLAM	183
4.7 Anomaly Detection Technology	187
Chapter 5 Communication Technologies Layer of IoT	193
5.1 Introduction	194
5.2 Wired and Wireless Access of IoT	197
5.2.1 Wired access	197
5.2.2 Wireless communications	200
5.2.3 Three basic prototypes of IoT communications	207
5.3 WLAN and Wi-Fi 6	211
5.3.1 Wi-Fi and IEEE 802.11 standards	212
5.3.2 Wi-Fi 6 and IEEE 802.11ah	215
5.3.3 Ad hoc networks for WLAN	219
5.3.4 Access for WSN	221
5.4 IEEE 802.11p(DSRC) and VANETs	226
5.4.1 DSRC in VANETs	226
5.4.2 DSRC based V2X	229
5.5 WPAN/IEEE 802.15.4 and ZigBee	231
5.5.1 Introduction of IEEE 802.15.4	232
5.5.2 Zigbee	234
5.5.3 6LoWPAN	238
5.6 Gateways and Protocols	243
5.6.1 Gateways	243
5.6.2 Protocols	250
5.6.3 Protocols of IETF IoT-Related WPAN	253
5.6.4 Proprietary LPWA	258
5.7 Cellular LPWAN and M2M in 5G Era	263
5.7.1 Cellular LPWAN	263
5.7.2 M2M in 5G era	267
5.7.3 M2M and CIoT	270
5.7.4 ETSI M2M and OMA LwM2M	275
5.7.5 3GPP network enhancement for LPWANs	281
5.7.6 Summary of LPWAN standards	287
5.8 5G CIoT and Beyond	292
5.8.1 5G CIoT	295
5.8.2 Massive MTC	298

5.8.3 Slices for critical IoT/M2M	307
5.8.4 URLLC for critical IoT	311
5.8.5 ML as a service in NWDAF	318
5.9 Satellite IoT	321
5.9.1 Preparations for the edge and 5G	322
5.9.2 Satellite-5G integration on the edge	331
5.9.3 Satellite-5G integration by the HAPS	341
5.9.4 Satellite constellations towards 6G	349
5.10 TIIoT and IEEE P1918.1	352
5.10.1 IEEE P1918.1	353
5.10.2 TIIoT and haptic codecs	360
5.10.3 ML as a service and 5G TSN	362
Acknowledgements	381
Chapter 6 Services and Platform Layer of IoT	383
6.1 Middleware	385
6.1.1 SOA	387
6.1.2 Middleware introduction	393
6.1.3 IoT middleware	400
6.1.4 OPC-UA as an industrial automation middleware	430
6.1.5 Robot middleware	441
6.1.6 Security of middleware	448
6.2 Primitive IoT and IoT Grids	453
6.2.1 Introduction of primitive IoT and IoT grid	454
6.2.2 Use case: IoT grids in vehicles	464
6.2.3 A grid view in industry sectors and RAMI 4.0	477
6.3 Cloud Computing	486
6.3.1 Cloud paradigm	487
6.3.2 Azure and Google clouds as examples	489
6.3.3 Collaborative cloud in industrial IoT sector	493
6.4 Edge Computing	499
6.4.1 Edge computing and fog computing	499
6.4.2 Requirement analysis and architecture of edge computing	508
6.4.3 MEC and 5G	518
6.4.4 User cases of edge deployment of Azure	522
6.4.5 Use cases for smart driving and smart building	525
6.4.6 Further discussion	529

6.5	IoV(V2X) and Autonomous Driving Vehicles	531
6.5.1	LBS and IoV	532
6.5.2	Different stages of IoVs	536
6.5.3	C-V2X and DSRC	543
6.5.4	IoV in 5G Era	554
6.5.5	The security of IoV	577
6.6	IIoT and Smart Manufacturing	584
6.6.1	Introduction	584
6.6.2	Industrial IoT and I4.0	586
6.6.3	The value chain of IIoT grids in IMSA	593
6.6.4	Healthy workforce: TRW use case as a safety grid	595
6.6.5	Further discussion	597
Chapter 7	Application Layer of IoT	601
7.1	Protocols of Applications	602
7.2	Digital Twin	607
7.2.1	Introduction	607
7.2.2	Characteristics of DT	608
7.2.3	IIoT and DT	612
7.2.4	Use cases	617
7.3	Applications in Smart Building and Smart Energy	620
7.3.1	Smart building	620
7.3.2	Smart energy	627
7.3.3	Energy internet and Internet of energy	636
7.4	Applications in Smart City	643
7.4.1	Resident grids in comprehensive views	646
7.4.2	Use cases of smart city	650
7.4.3	MONICA project	653
7.4.4	Blockchain on the IoT edge	656
7.5	Smart Agriculture	661
7.6	Application of TIIoT	666
7.6.1	Finger kinesthetic perception schemes and AR	666
7.6.2	Inference as a ML service	668
7.6.3	TIIoT and remote diagnosis	670
Chapter 8	IoT Security	677
8.1	Introduction	677
8.2	The Baseline of IoT Security	681
8.2.1	What is IoT security?	682

8.2.2	Insight and extension of IoT security	687
8.2.3	A layer model of IoT security	691
8.3	Security in Perception Layer	693
8.3.1	Perception security technology	693
8.3.2	Perception security strategy	697
8.4	Security in Networks and a Reference Architecture	700
8.4.1	A reference security architecture of IoT network layer	701
8.4.2	Security technology and mechanics	704
8.5	IoT Security and Secure Communication	708
8.5.1	Functional safety and security	708
8.5.2	Communication in safety/security	711
8.5.3	Secure network technologies	716
8.6	Security of Platform and Application	718
8.6.1	Platform security	719
8.6.2	Security of service and strategy management	726
8.6.3	Security for applications layer	731
8.7	Cloud/Edge Security	734
8.7.1	Secure by design	735
8.7.2	Cloud and edge security policy and technology	742
8.7.3	Edge security model	752
8.7.4	The rule training by federated learning model	762
	Acknowledgment	767
	Appendix	767
Chapter 9	Conclusions and Expectations	769
	<i>Bibliography</i>	775
	<i>Index</i>	805
