Section 1 Solar thermal energy

1.1 Sun composition, solar angles, and estimation of solar radiation 3

Bashria A.A. Yousef, Ali Radwan, Abdul Ghani Olabi and
Mohammad Ali Abdelkareem

1.1.1 Sun composition and nature of sunlight	3
1.1.2 Solar radiation nomenclature	4
1.1.3 Solar time	6
1.1.4 Solar angles	6
1.1.5 Sun path diagram	11
1.1.6 Extraterrestrial solar radiation	12
1.1.7 Atmospheric attenuation	14
1.1.8 Terrestrial solar radiation	15
1.1.9 Total radiation on a tilted surface	17
1.1.10 Estimation of daily and hourly beam and diffuse radiation on tilted surface	19
1.1.11 Conclusion	21
References	22

1.2 Development of solar thermal energy systems 23

Bashria A.A. Yousef, Ali Radwan, Abdul Ghani Olabi and
Mohammad Ali Abdelkareem

1.2.1 Historical background	23
1.2.2 Solar thermal energy systems	27
1.2.2.1 Non-concentrating solar collector	28
1.2.2.2 Concentrating solar collector	30
1.2.3 Conclusion	41
References	41

1.3 Solar thermal energy applications 45

Ali Radwan, Mohammad Ali Abdelkareem, Bashria A.A. Yousef and
Abdul Ghani Olabi

1.3.1 Introduction	45
1.3.2 Applications of solar thermal energy	45
1.3.2.1 Solar thermal energy for domestic water heating	46

1.3.2.2	Solar thermal energy for drying processes	53
1.3.2.3	Solar energy for hybrid heat and electricity generation in photovoltaic thermal collectors	56
1.3.2.4	Thermoelectric generators	59
1.3.2.5	Concentrator solar power concentrated solar power	60
1.3.2.6	Solar thermal energy for desalination	65
1.3.2.7	Solar thermal energy for cooling purposes	67
1.3.2.8	Other applications	71
1.3.3	Conclusions	71
	References	71
1.4	Case studies and analysis of solar thermal energy systems	75
	Montaser Mahmoud, Abdul Ghani Olabi, Ali Radwan, Bashria A.A. Yousef and Mohammad Ali Abdelkareem	
	Nomenclature	75
	Abbreviations	76
	Subscriptions	76
1.4.1	Introduction	76
1.4.2	Case Study #1—relative sun location	78
1.4.2.1	Solar altitude angle	78
1.4.2.2	Solar azimuth angle	79
1.4.2.3	Day length	79
1.4.3	Case Study #2—performance assessment	80
1.4.3.1	Overall efficiency	80
1.4.3.2	Steam power cycle analysis	81
1.4.4	Case Study #3—thermal energy storage	82
1.4.4.1	Storage volume	82
1.4.4.2	Discharging mode	84
1.4.4.3	Capacity enlargement	85
1.4.5	Case Study #4—solar collector	86
1.4.5.1	Fin efficiency factor	86
1.4.5.2	Collector efficiency factor	87
1.4.5.3	Collector heat removal factor	88
1.4.5.4	Collector efficiency	88
1.4.6	Conclusions	88
	References	89
1.5	Thermal analysis of solar collectors	93
	Bashria A.A. Yousef, Ali Radwan, Abdul Ghani Olabi and Mohammad Ali Abdelkareem	
1.5.1	Thermal performance of non-concentrating solar collectors	93

1.5.1.1	Thermal analysis of liquid solar collector	93
1.5.1.2	Solar air heaters	104
1.5.1.3	Collector tests: performance measurements, efficiency, and incident angle modifier	106
1.5.2	Thermal performance of concentrating solar collectors	109
1.5.2.1	Concentration ratio	110
1.5.2.2	Optical efficiency	112
1.5.2.3	Local concentration ratio	113
1.5.2.4	Thermal analysis	114
1.5.3	Conclusion	119
	References	119

1.6 Energy and exergy analyses of a photovoltaic/thermal (PV/T) air collector **121**

Ali Radwan, Mohammad Ali Abdelkareem, Bashria A.A. Yousef,
Essam M. Abo-Zahhad and Abdul Ghani Olabi

1.6.1	Introduction	121
1.6.2	PV modules and factors affecting the PV module performance	122
1.6.3	Thermal modeling of PV/T module using ANSYS Fluent	126
1.6.3.1	Physical domains and model description	127
1.6.3.2	Model governing equations	128
1.6.3.3	Solution steps and methodology applied in ANSYS Fluent software	134
1.6.3.4	Problem setup in Fluent	136
1.6.3.5	Energy evaluation results at various operating conditions	144
1.6.3.6	Exergy analysis of the PV/T air collectors under different operating conditions	146
1.6.4	Conclusions	149
	References	151

Section 2 Solar photovoltaics “PV” energy

2.1 Introduction and definition of solar energy **157**

Malek Kamal Hussien Rabaia, Abdul Ghani Olabi,
Mohammad Ali Abdelkareem and Enas Taha Sayed

2.1.1	Introduction	157
2.1.2	Factors affecting the solar radiation energy	158
2.1.3	Characteristics of solar radiation energy	159
2.1.4	Earth radiation budget	163

2.1.5	The diffuse radiation	164
2.1.6	Factors affecting solar radiation intensity	166
2.1.7	Conclusion	171
	References	172
2.2	Developments of solar photovoltaics	175
	Malek Kamal Hussien Rabaia, Enas Taha Sayed, Mohammad Ali Abdelkareem and Abdul Ghani Olabi	
2.2.1	Introduction	175
2.2.2	First-generation solar photovoltaic cells	178
2.2.2.1	Single-crystalline silicon	178
2.2.2.2	Multicrystalline silicon	179
2.2.3	Second-generation solar photovoltaic cells	179
2.2.3.1	Amorphous silicon thin-film photovoltaic technology	179
2.2.3.2	Gallium arsenide	180
2.2.3.3	Cadmium telluride (thin-film photovoltaic technology)	180
2.2.3.4	Copper indium gallium selenide (thin-film photovoltaic technology)	181
2.2.4	Third-generation solar photovoltaic cells and future trends	182
2.2.4.1	Perovskite solar cells	182
2.2.4.2	Dye-sensitized solar cells	183
2.2.4.3	Organic photovoltaic solar cells	183
2.2.4.4	Quantum dot technology	183
2.2.5	Advanced modules' architectural structures	184
2.2.5.1	Tandem solar cells	184
2.2.5.2	Passivated emitter and rear cell and the half-cut cells	185
2.2.5.3	Bifacial solar cells	185
2.2.5.4	Multibusbars technology	185
2.2.5.5	Solar shingles	186
2.2.5.6	Concentrating photovoltaic solar cells	186
2.2.5.7	Transparent photovoltaic technologies	187
2.2.6	Conclusion	188
	References	188
2.3	Solar photovoltaics: challenges and applications	197
	Malek Kamal Hussien Rabaia, Enas Taha Sayed, Mohammad Ali Abdelkareem and Abdul Ghani Olabi	
2.3.1	Introduction	197
2.3.2	Background	198

2.3.2.1	Working principles of solar photovoltaics cells	198
2.3.3	Challenges	202
2.3.3.1	Irradiance variation effect	202
2.3.3.2	Temperature effect	203
2.3.3.3	Shading effect	204
2.3.4	Applications of solar photovoltaics	209
2.3.4.1	Desalination	209
2.3.4.2	Residential applications	211
2.3.4.3	Power plants	212
2.3.4.4	Green hydrogen	212
2.3.5	Conclusions	214
	References	214
2.4	Technical review on solar photovoltaics	219
	Montaser Mahmoud, Abdul Ghani Olabi, Mohammad Ali Abdelkareem, Malek Kamal Hussien Rabaia and Enas Taha Sayed	
	Abbreviations	219
2.4.1	Introduction	219
2.4.2	Electron–hole recombination	221
2.4.3	Interconnections and degradation of performance	223
2.4.3.1	Multibusbars	223
2.4.3.2	Bypass diodes	224
2.4.4	Capturing solar irradiance	224
2.4.4.1	Solar tracking systems	225
2.4.4.2	Tandem photovoltaics	225
2.4.4.3	Concentrated photovoltaics	225
2.4.4.4	Bifacial photovoltaics	226
2.4.5	Cleaning and cooling methods for photovoltaics	226
2.4.5.1	Photovoltaics cleaning methods	227
2.4.5.2	Photovoltaics cooling methods	227
2.4.6	Environmental impacts	228
2.4.7	Conclusions	230
	References	231
2.5	Case studies and analysis of solar photovoltaics	237
	Malek Kamal Hussien Rabaia, Montaser Mahmoud, Enas Taha Sayed, Mohammad Ali Abdelkareem and Abdul Ghani Olabi	
2.5.1	Introduction	237
2.5.2	Solar irradiance and photovoltaic characteristics	238
2.5.2.1	Solution	239

2.5.3 Photovoltaic system design	244
2.5.3.1 Solution	246
2.5.4 Photovoltaic's life cycle economic analysis	248
2.5.4.1 Solution	250
2.5.5 Photovoltaic's statistical data analysis	252
2.5.5.1 Solution	253
2.5.6 Conclusion	263
Appendix	263
References	274

2.6 Modeling and simulation of solar photovoltaic energy systems **281**

Montaser Mahmoud, Enas Taha Sayed, Mohammad Ali Abdelkareem,
Malek Kamal Hussien Rabaia and Abdul Ghani Olabi

Abbreviations	281
2.6.1 Introduction	281
2.6.2 Hybrid Optimization Model for Electric Renewables (HOMER) software	283
2.6.2.1 Advantages of HOMER	284
2.6.2.2 Disadvantages of HOMER	284
2.6.3 System Advisor Model (SAM)	284
2.6.3.1 Advantages of SAM	285
2.6.3.2 Disadvantages of SAM	285
2.6.4 Photovoltaic systems (PVsyst)	285
2.6.4.1 Advantages of PVsyst	286
2.6.4.2 Disadvantages of PVsyst	286
2.6.5 Photovoltaic Solar (PV-SOL)	286
2.6.5.1 Advantages of PV-SOL	287
2.6.5.2 Disadvantages of PV-SOL	287
2.6.6 Renewable Energy Technologies Screen (RETScreen)	287
2.6.6.1 Advantages of RETScreen	287
2.6.6.2 Disadvantages of RETScreen	288
2.6.7 Solar Pro	288
2.6.7.1 Advantages of Solar Pro	289
2.6.7.2 Disadvantages of Solar Pro	289
2.6.8 PV F-Chart	289
2.6.8.1 Advantages of PV F-Chart	289
2.6.8.2 Disadvantages of PV F-Chart	290
2.6.9 Conclusions	290
References	291

Section 3 Wind energy

3.1 Introduction and definition of wind energy 299

Montaser Mahmoud, Mohamad Ramadan,
Mohammad Ali Abdelkareem and Abdul Ghani Olabi

Nomenclature	299
Abbreviations	299
3.1.1 Introduction	299
3.1.2 Wind energy	300
3.1.3 Windmill	302
3.1.4 Wind turbines	302
3.1.4.1 Horizontal-axis wind turbine	304
3.1.4.2 Vertical-axis wind turbine	305
3.1.4.3 Combined horizontal- and vertical-axis wind turbine	308
3.1.5 Wind farm	309
3.1.6 Conclusions	311
References	312

3.2 Developments of wind energy systems 315

Montaser Mahmoud, Mohamad Ramadan,
Mohammad Ali Abdelkareem and Abdul Ghani Olabi

Abbreviations	315
3.2.1 Introduction	315
3.2.2 Wind turbine scale	318
3.2.2.1 Large-scale wind turbines	318
3.2.2.2 Small-scale wind turbines	320
3.2.3 Noise reduction	320
3.2.3.1 Aerodynamic noise reduction	320
3.2.3.2 Mechanical noise reduction	321
3.2.4 Wind turbine vibration control	322
3.2.5 Flexible wind turbine blades	324
3.2.6 Conclusions	325
References	326

3.3 Applications of wind energy 331

Montaser Mahmoud, Mohamad Ramadan,
Mohammad Ali Abdelkareem and Abdul Ghani Olabi

Nomenclature	331
Abbreviations	331
Subscripts	331

3.3.1 Introduction	332
3.3.2 Wind energy applications	332
3.3.2.1 Transportation	333
3.3.2.2 Grinding grain	333
3.3.2.3 Pumping water	334
3.3.2.4 Power generation	336
3.3.2.5 Hydrogen production	338
3.3.2.6 Sports	339
3.3.3 Summary	340
3.3.4 Conclusions	341
References	342
3.4 Review on wind energy systems	347
Montaser Mahmoud, Mohammad Ali Abdelkareem, Tabbi Wilberforce and Abdul Ghani Olabi	
Abbreviations	347
3.4.1 Introduction	347
3.4.2 Performance optimization	349
3.4.3 Cost assessment	352
3.4.4 Environmental impact	353
3.4.5 Energy storage for wind energy systems	355
3.4.6 Conclusions	357
References	358
3.5 Case studies and analysis of wind energy systems	363
Montaser Mahmoud, Tareq Salameh, Ahmed Al Makky, Mohammad Ali Abdelkareem and Abdul Ghani Olabi	
Nomenclature	363
Abbreviations	364
Subscriptions	364
3.5.1 Introduction	364
3.5.2 Case study #1—power assessment	366
3.5.2.1 Wind power	366
3.5.2.2 Power ratio	366
3.5.2.3 Power coefficient	367
3.5.2.4 Rotational speed	368
3.5.2.5 Energy production	368
3.5.2.6 Power spectral density	371

3.5.3 Case study #2—materials endurance	372
3.5.3.1 Brake disk	373
3.5.3.2 Rotor acceleration	373
3.5.3.3 Main shaft	374
3.5.3.4 Wind turbine tower	376
3.5.4 Case study #3—electrical equipment	377
3.5.4.1 Battery bank	377
3.5.4.2 Electromagnetic braking system	378
3.5.5 Case study #4—gearbox	380
3.5.5.1 Rotational speeds	380
3.5.5.2 Tangential forces	381
3.5.6 Case study #5—cost assessment	382
3.5.7 Conclusions	384
References	385
3.6 Modeling and simulation of wind energy systems	389
Montaser Mahmoud, Mohammad Ali Abdelkareem and Abdul Ghani Olabi	
Nomenclature	389
Abbreviations	389
3.6.1 Introduction	390
3.6.2 Wind turbine models	391
3.6.2.1 Blade element momentum	391
3.6.2.2 Reynolds-averaged Navier—Stokes	392
3.6.2.3 Large eddy simulation	394
3.6.2.4 Hybrid RANS-LES	395
3.6.3 Software tools	397
3.6.3.1 FAST	397
3.6.3.2 ANSYS-fluent	398
3.6.3.3 ABAQUS	399
3.6.4 Conclusions	399

Section 4 Hydro energy

4.1 Introduction and definition of hydro energy	407
Tabbi Wilberforce, Enas Taha Sayed, Mohammad Ali Abdelkareem, Montaser Mahmoud and Abdul Ghani Olabi	
4.1.1 Introduction	407
4.1.2 Classification of hydropower	408

4.1.3	Overview of reaction and impulse turbine	414
4.1.4	Cavitation	420
4.1.5	Conclusion	421
	References	422
4.2	Development of hydropower technology	427
	Tabbi Wilberforce, Enas Taha Sayed, Mohammad Ali Abdelkareem, Montaser Mahmoud and Abdul Ghani Olabi	
4.2.1	Introduction	427
4.2.2	Types of hydro turbines	430
4.2.2.1	Cross-flow hydro turbine	430
4.2.2.2	Pelton turbine	434
4.2.2.3	Turgo turbine	438
4.2.2.4	Francis turbine	441
4.2.2.5	Kaplan turbine	443
4.2.3	Conclusion	445
	References	446
4.3	Application and SWOT analysis of hydro energy	451
	Tabbi Wilberforce, Enas Taha Sayed, Mohammad Ali Abdelkareem, Montaser Mahmoud and Abdul Ghani Olabi	
4.3.1	Introduction	451
4.3.2	Category of hydropower schemes	455
4.3.2.1	Run-of-river	456
4.3.2.2	Storage hydropower	458
4.3.2.3	Pumped hydropower	459
4.3.3	SWOT analysis of hydropower energy sources	460
4.3.3.1	Strength of hydropower energy sources	460
4.3.3.2	Weakness of hydropower energy	462
4.3.3.3	Opportunities relating to hydropower schemes	463
4.3.3.4	Threats	464
4.3.4	Conclusion	466
	References	467
4.4	A review on hydro energy	471
	Tabbi Wilberforce, Enas Taha Sayed, Mohammad Ali Abdelkareem, Montaser Mahmoud and Abdul Ghani Olabi	
4.4.1	Introduction	471
4.4.2	Hydropower development at a wastewater treatment facility	473

4.4.3	Technological advancement for lower-head hydroelectric wastewater treatment works	479
4.4.3.1	Factors impeding the development of hydropower schemes	488
4.4.4	Toxic emissions from hydropower schemes	489
4.4.5	Environmental impact of hydro schemes as well as suggested remedies	490
4.4.6	Conclusion	491
	References	492
4.5	Case studies and analysis of hydro energy systems	499
	Montaser Mahmoud, Tabbi Wilberforce, Tareq Salameh, Ahmed Al Makky and Abdul Ghani Olabi	
	Nomenclature	499
	Abbreviations	499
	Subscriptions	500
4.5.1	Introduction	500
4.5.2	Case study #1—head loss	501
4.5.2.1	Pipe 1—14 mm	503
4.5.2.2	Pipe 2—18 mm	504
4.5.2.3	Pipe 3—22 mm	506
4.5.2.4	Head loss analysis	508
4.5.3	Case study #2—hydro pump	509
4.5.3.1	Major head loss	509
4.5.3.2	Minor head loss	511
4.5.3.3	Pumping power	512
4.5.3.4	Electric power	513
4.5.4	Case study #3—hydro turbine	513
4.5.5	Conclusions	515
	References	516
4.6	Modeling and simulation of hydro energy systems	519
	Tabbi Wilberforce, Enas Taha Sayed, Mohammad Ali Abdelkareem, Montaser Mahmoud and Abdul Ghani Olabi	
	Nomenclature	519
4.6.1	Introduction	520
4.6.1.1	Development of hydropower schemes	521
4.6.2	Mathematical modeling for hydroelectric power station	523
4.6.2.1	Linear models	524
4.6.2.2	Nonlinear models	526

4.6.3 Modeling of hydro turbines	526
4.6.3.1 Eulerian and Lagrangian method	527
4.6.3.2 Numerical modeling—boundary conditions	529
4.6.4 Conclusion	531
