Contents

<i>Preface</i>	xvi
<i>Acknowledgements</i>	xix

1	Balancing a mix	1
	<i>Day 1 – Welcome</i>	<i>1</i>
	<i>Day 2 – Balancing a mix</i>	<i>1</i>
	<i>Day 3 – Why is balancing a mix so overlooked?</i>	<i>2</i>
	<i>Day 4 – SPL vs. perceived loudness</i>	<i>3</i>
	<i>Day 5 – 24-bit</i>	<i>3</i>
	<i>Day 6 – Reference tracks</i>	<i>4</i>
	<i>Day 7 – What is gain staging?</i>	<i>5</i>
	<i>Day 8 – Normalising region gain</i>	<i>7</i>
	<i>Day 9 – Pre-fader metering</i>	<i>8</i>
	<i>Day 10 – Phase cancellation</i>	<i>9</i>
	<i>Day 11 – Bottom-up mixing</i>	<i>9</i>
	<i>Day 12 – Top-down mixing</i>	<i>10</i>
	<i>Day 13 – The clockface technique</i>	<i>11</i>
	<i>Day 14 – Mono compatibility</i>	<i>13</i>
	<i>Day 15 – The VU meter trick</i>	<i>13</i>
	<i>Day 16 – Balancing vocals</i>	<i>14</i>
	<i>Day 17 – The mixing hierarchy</i>	<i>15</i>
	<i>Day 18 – A singular focal point</i>	<i>15</i>
	<i>Day 19 – The rule of four</i>	<i>16</i>
	<i>Day 20 – The pink noise technique</i>	<i>16</i>
	<i>Day 21 – Loudest first</i>	<i>17</i>
	<i>Day 22 – Set a timer</i>	<i>18</i>
	<i>Day 23 – Leave your busses</i>	<i>18</i>
	<i>Day 24 – Watch your meters</i>	<i>18</i>
	<i>Day 25 – Split them up</i>	<i>19</i>
	<i>Day 26 – FFT metering</i>	<i>20</i>

Day 27 – Metering checklist 20

Day 28 – Unit summary 21

Checklist 21

Further reading 21

2 Panning a mix

23

Day 1 – Panning a mix 23

Day 2 – Know your pan pots 23

Day 3 – From whose perspective are you mixing? 24

Day 4 – Kick and snare 25

Day 5 – Overheads and rooms 26

Day 6 – Hi-hats 26

Day 7 – Toms 27

Day 8 – Bass 28

Day 9 – Guitars 28

Day 10 – Synths and keys 29

Day 11 – Horns, wind, and strings 30

Day 12 – Vocals 31

Day 13 – The LCR technique 31

Day 14 – Low-frequency panning 32

Day 15 – Double-tracked guitars 33

Day 16 – Complementary panning 33

Day 17 – Snare on- or off-centre? 34

Day 18 – Narrow verses, wide choruses 35

Day 19 – Automating movement 35

Day 20 – Checking mono compatibility 36

Day 21 – Consider the club 37

Day 22 – Crosstalk 37

Day 23 – Don't overload one side 38

Day 24 – Recreating a vintage vibe 38

Day 25 – Less is more 39

Day 26 – Orchestral panning 1 39

Day 27 – Orchestral panning 2 40

Day 28 – Unit summary 41

Checklist 41

Further reading 42

3 EQ

43

Day 1 – Applying EQ 43

Day 2 – Fundamentals and overtones 43

- Day 3 – Defining frequency bands 44
- Day 4 – Different types of equalisers 45
- Day 5 – Anatomy of an EQ 1 47
- Day 6 – Anatomy of an EQ 2 48
- Day 7 – Subtractive/corrective EQ 49
- Day 8 – Additive/creative EQ 49
- Day 9 – EQ can't fix a poor recording 50
- Day 10 – Have intent 51
- Day 11 – Learn the frequency spectrum 51
- Day 12 – Use an EQ chart 52
- Day 13 – The big four: Remove the gross stuff 52
- Day 14 – The big four: Enhance the good stuff 53
- Day 15 – The big four: Make things sound different 54
- Day 16 – The big four: Create space 55
- Day 17 – Don't be fooled by volume 55
- Day 18 – Small for natural, large for unnatural 56
- Day 19 – Prioritise cuts 56
- Day 20 – Don't EQ in solo 57
- Day 21 – Small changes add up 58
- Day 22 – Subtle with stock, bold with analogue 58
- Day 23 – Don't obsess over plugin order 59
- Day 24 – Remove the mud 59
- Day 25 – EQ in mono 60
- Day 26 – Dynamic EQ 61
- Day 27 – How do you pick your EQ? 61
- Day 28 – Unit summary 62
- Checklist 63
- Further reading 63

4 Compression

64

- Day 1 – What is compression? 64
- Day 2 – Compressor anatomy: Ratio 65
- Day 3 – Compressor anatomy: Threshold 65
- Day 4 – Compressor anatomy: Attack and release 66
- Day 5 – Compressor anatomy: Knee and make-up gain 67
- Day 6 – The four analogue architectures: VCA 68
- Day 7 – The four analogue architectures: Optical 68
- Day 8 – The four analogue architectures: FET 69
- Day 9 – The four analogue architectures: Variable Mu 69
- Day 10 – Use one compressor to learn 70
- Day 11 – What comes first: Compression or EQ? 71

- Day 12 – Don't compress just because you can* 71
- Day 13 – Parallel compression is the best of both* 72
- Day 14 – Matching input and output levels accurately* 73
- Day 15 – Avoid presets and solo* 73
- Day 16 – Stacking compressors* 74
- Day 17 – Compressing low end* 75
- Day 18 – The extreme-threshold technique* 75
- Day 19 – Don't kill the transients* 76
- Day 20 – A little here, a little there* 76
- Day 21 – The right compressor for the job* 77
- Day 22 – Don't be fooled by volume* 78
- Day 23 – Complementing compression with transient enhancement* 78
- Day 24 – Sidechain compression* 79
- Day 25 – Sidechain EQ* 80
- Day 26 – Colouring your sound* 81
- Day 27 – Multiband compression* 82
- Day 28 – Unit summary* 82
- Checklist 83
- Further reading 83

5 Reverb

85

- Day 1 – What is reverb?* 85
- Day 2 – Why do you need reverb?* 85
- Day 3 – What does reverb do?* 87
- Day 4 – Different types of reverb: Hall* 88
- Day 5 – Different types of reverb: Chamber* 88
- Day 6 – Different types of reverb: Room* 89
- Day 7 – Different types of reverb: Plate* 89
- Day 8 – Different types of reverb: Spring* 90
- Day 9 – Different types of reverb: Convolution* 91
- Day 10 – Different types of reverb: Gated* 91
- Day 11 – Different types of reverb: Honourable mentions* 92
- Day 12 – Reverb parameters: Type, size, decay, and mix* 93
- Day 13 – Reverb parameters: Pre-delay, early reflections, and diffusion* 94
- Day 14 – Eight steps to perfect reverb: Aux send or insert slot?* 95
- Day 15 – Eight steps to perfect reverb: Selecting reverb type* 95

- Day 16 – Eight steps to perfect reverb: Set your size 96
- Day 17 – Eight steps to perfect reverb: Set your decay 96
- Day 18 – Eight steps to perfect reverb: Set your pre-delay 97
- Day 19 – Eight steps to perfect reverb: Set your early reflections 98
- Day 20 – Eight steps to perfect reverb: Set your diffusion level 98
- Day 21 – Eight steps to perfect reverb: Adjust the dry/wet send amount 99
- Day 22 – Top tips: Less is more 99
- Day 23 – Top tips: Mono, stereo, or panned? 100
- Day 24 – Top tips: Pre- or post-fader? 101
- Day 25 – Top tips: Treat reverb like an instrument 101
- Day 26 – Top tips: How many reverbs should you use? 102
- Day 27 – The formula 103
- Day 28 – Unit summary 104
- Checklist 105
- Further reading 105

6 Delay and modulation effects

107

- Day 1 – What is delay in music-production? 107
- Day 2 – Delay times 107
- Day 3 – Primary delay types: Tape 108
- Day 4 – Primary delay types: Analogue 109
- Day 5 – Primary delay types: Digital 109
- Day 6 – Delay subtypes: Slapback echo 110
- Day 7 – Delay subtypes: Doubling echo 111
- Day 8 – Delay subtypes: Looping 111
- Day 9 – Delay subtypes: Multitap 112
- Day 10 – Delay subtypes: Ping-pong 112
- Day 11 – Delay subtypes: Dub 113
- Day 12 – A reminder about phase 114
- Day 13 – Modulated delay: Chorus 114
- Day 14 – Modulated delay: Flanger 115
- Day 15 – Modulated delay: Phaser 116
- Day 16 – Top tips: Have an intention 116
- Day 17 – Top tips: Be selective 117
- Day 18 – Top tips: Work out your timing 118
- Day 19 – Top tips: Leakage 119
- Day 20 – Top tips: Processing delays 120

Day 21 – Top tips: Automation	121
Day 22 – Top tips: Create manual delays	121
Day 23 – Top tips: Flaming delays	122
Day 24 – Top tips: Panning delays	122
Day 25 – Top tips: Tempo-syncing	123
Day 26 – Top tips: Making sounds bigger/wider	124
Day 27 – Top tips: Enhance important things	124
Day 28 – Unit summary	125
Checklist	126

7 Automation

127

Day 1 – What is automation?	127
Day 2 – Automation modes	127
Day 3 – Automation types: Fades and curves	128
Day 4 – Automation types: Binary, step, and spike	129
Day 5 – Have intent!	130
Day 6 – Bouncing automation	130
Day 7 – Three stages: Problem-solve	131
Day 8 – Three stages: Flow	132
Day 9 – Three stages: Create	132
Day 10 – When should you automate?	133
Day 11 – Use No. 1: Levels	134
Day 12 – Use No. 2: Stereo width	135
Day 13 – Use No. 3: More automation, less compression	136
Day 14 – Use No. 4: Fix plosives and sibilance	137
Day 15 – Use No. 5: Increase plugin control	138
Day 16 – Use No. 6: Aux sends	138
Day 17 – Animate your transitions	140
Day 18 – Automate synth parameter changes	140
Day 19 – Emphasise drum fills	141
Day 20 – Tidy up	142
Day 21 – Accentuate vocals	143
Day 22 – Automate panning for sound design	144
Day 23 – Automate EQ	144
Day 24 – Make e-drums sound more natural	145
Day 25 – Tempo-synced automation effects	146
Day 26 – Automate your master buss	147
Day 27 – Automate your tempo	148
Day 28 – Unit summary	149
Checklist	150

8 Vocals

152

- Day 1 – Vocals 101 152*
- Day 2 – Create space pockets 153*
- Day 3 – Open-back vs closed-back 153*
- Day 4 – Use a pop shield 154*
- Day 5 – Consider mike emulation 155*
- Day 6 – DSP-powered monitor effects 156*
- Day 7 – The proximity effect 156*
- Day 8 – Get your levels right 157*
- Day 9 – Get your mix right 158*
- Day 10 – Record everything! 158*
- Day 11 – Harmonies and layers 159*
- Day 12 – Gate post-recording 160*
- Day 13 – Loop and comp 161*
- Day 14 – Tuning and other modulation effects 162*
- Day 15 – Subtractive EQ 163*
- Day 16 – Consider the genre 164*
- Day 17 – Tone-shaping EQ 164*
- Day 18 – Compression 165*
- Day 19 – More compression 166*
- Day 20 – . . . and even more compression! 167*
- Day 21 – De-ess with care 167*
- Day 22 – Saturation and distortion 168*
- Day 23 – Don't overdo reverb and delay 169*
- Day 24 – Pan backing vocals 169*
- Day 25 – Converting to MIDI 170*
- Day 26 – Vocal automation 171*
- Day 27 – Frequency allocation 172*
- Day 28 – Unit summary 173*
- Checklist 173*
- Further reading 174*

9 Synthesis

175

- Day 1 – Synthesis terrified me 175*
- Day 2 – What is a synthesiser? 176*
- Day 3 – Oscillators 176*
- Day 4 – Waveshapes 178*
- Day 5 – Combining oscillators 179*
- Day 6 – Tuning, unison, and voices 180*
- Day 7 – Filters 181*

<i>Day 8 – Amplifiers and envelopes</i>	181
<i>Day 9 – Modulation</i>	183
<i>Day 10 – LFOs</i>	184
<i>Day 11 – Other possible features</i>	184
<i>Day 12 – What makes a synth unique?</i>	186
<i>Day 13 – 1/10: Subtractive synthesis</i>	186
<i>Day 14 – 2/10: FM synthesis</i>	187
<i>Day 15 – 3/10: Sample-based synthesis</i>	187
<i>Day 16 – 4/10: Wavetable synthesis</i>	188
<i>Day 17 – 5/10: Vector synthesis</i>	188
<i>Day 18 – 6/10: Additive synthesis</i>	189
<i>Day 19 – 7/10: Spectral synthesis</i>	189
<i>Day 20 – 8/10: Physical modelling</i>	189
<i>Day 21 – 9/10: Granular synthesis</i>	190
<i>Day 22 – 10/10: West Coast synthesis</i>	190
<i>Day 23 – The main synth sounds</i>	191
<i>Day 24 – 20 top tips: 1–5</i>	192
<i>Day 25 – 20 top tips: 6–10</i>	193
<i>Day 26 – 20 top tips: 11–15</i>	194
<i>Day 27 – 20 top tips: 16–20</i>	195
<i>Day 28 – Unit summary</i>	196
<i>Further reading</i>	196

10 Mastering

197

<i>Day 1 – The dark art</i>	197
<i>Day 2 – Mixing vs mastering</i>	197
<i>Day 3 – A brief history</i>	198
<i>Day 4 – Preparing to master</i>	199
<i>Day 5 – Mix levels and compression</i>	200
<i>Day 6 – Loudness, the war, and penalties</i>	201
<i>Day 7 – The most important piece of gear is . . .</i>	202
<i>Day 8 – Don't master your own tracks</i>	203
<i>Day 9 – Digital vs analogue</i>	204
<i>Day 10 – Optimising, not fixing</i>	205
<i>Day 11 – Good mastering preparation</i>	206
<i>Day 12 – The four stages of mastering: EQ</i>	206
<i>Day 13 – The four stages of mastering: Compression</i>	208
<i>Day 14 – The four stages of mastering: Limiting</i>	209
<i>Day 15 – The four stages of mastering: Metering</i>	210
<i>Day 16 – Using appropriate reference tracks</i>	211

<i>Day 17 – Trimming the start and end</i>	212
<i>Day 18 – Bouncing/rendering/exporting</i>	213
<i>Day 19 – Metadata</i>	214
<i>Day 20 – Beyond the essentials: Saturation</i>	215
<i>Day 21 – Beyond the essentials: Stereo enhancement</i>	216
<i>Day 22 – Beyond the essentials: Parallel processing</i>	217
<i>Day 23 – Beyond the essentials: Serial limiting</i>	218
<i>Day 24 – Adding reverb</i>	218
<i>Day 25 – Avoid ear fatigue</i>	219
<i>Day 26 – Stem mastering</i>	220
<i>Day 27 – Considering the medium and technical limitations</i>	221
<i>Day 28 – Unit summary</i>	222
<i>Further reading</i>	223
