# Contents

Preface .....	xxiii
Acknowledgments .....	xxvii
Authors.....	xxix
Chapter 1	
Concepts of Instrumental Analytical Chemistry .....	1
1.1 Introduction: What Is Analytical Chemistry? .....	1
1.1.1 The Difference between Weight and Mass .....	2
1.2 Analytical Approach .....	3
1.2.1 Defining the Problem .....	3
1.2.1.1 Qualitative Analysis .....	4
1.2.1.2 Quantitative Analysis .....	5
1.2.2 Designing the Analytical Method .....	10
1.2.3 Sampling .....	11
1.2.3.1 Gas Samples .....	13
1.2.3.2 Liquid Samples .....	14
1.2.3.3 Solid Samples .....	14
1.2.4 Storage of Samples .....	14
1.3 A Conceptual Discussion about Uncertainty in Measurements .....	15
1.4 Basic Statistics and Data Handling .....	17
1.4.1 Significant Figures .....	17
1.4.2 Accuracy and Precision .....	18
1.4.3 Types of Errors.....	19
1.4.3.1 Determinate Error .....	20
1.4.3.2 Indeterminate Error .....	22
1.4.4 Definitions for Statistics .....	23
1.4.5 Quantifying Random Error .....	23
1.4.5.1 Confidence Limits.....	26
1.4.5.2 Variance.....	27
1.4.6 Detection of Outliers.....	27
1.4.7 Expressing Uncertainty.....	28
1.5 Sample Preparation.....	29
1.5.1 Acid Dissolution and Digestion.....	29
1.5.2 Fusions .....	31
1.5.3 Dry Ashing and Combustion.....	31
1.5.4 Extraction.....	32
1.5.4.1 Solvent Extraction .....	32
1.5.4.2 Solid-Phase Extraction .....	35
1.5.4.3 QuEChERS .....	35
1.5.4.4 Solid-Phase Microextraction.....	36
1.6 Performing the Measurement .....	38
1.6.1 Signals and Noise .....	39
1.6.2 Plotting Calibration Curves .....	41
1.7 Assessing the Data .....	42
1.7.1 Limit of Detection.....	43
1.7.2 Limit of Quantitation .....	43
1.8 Reference Materials and Reference Data .....	44
1.8.1 Reference Materials .....	44
1.8.2 Reference Data.....	44
Problems .....	45
Bibliography .....	46

Chapter 2	
Safety in the Instrumentation Laboratory .....	49
2.1 Electrical Hazards and Safety .....	50
2.1.1 Electrical Lines, Receptacles, and Cables .....	50
2.1.2 PAT Testing Procedures in the U.K. ....	55
2.1.3 Electrical Shocks .....	55
2.1.4 Batteries .....	55
2.1.5 Portable Generators .....	56
2.1.6 A Brief Discussion about Ground.....	57
2.2 Instrument Cooling .....	58
2.3 Compressed Gas Cylinder Safety .....	58
2.3.1 Compressed Gas Regulators and Manifolds.....	59
2.3.2 Gas Cylinder Markings.....	60
2.4 Cryogenic Fluid Safety .....	61
2.4.1 Cryogenic Fluids.....	61
2.4.2 Cryogenic Liquid Containers.....	63
2.5 The Use of Fume Hoods in the Instrumentation Laboratory.....	64
2.6 Laser Safety .....	66
2.7 Compressed Air Line Safety .....	67
2.8 Ladder Safety .....	67
2.8.1 Step Ladders .....	67
2.8.2 Straight, Combination, and Extension Ladders .....	68
2.9 Hearing Protection.....	68
2.10 Selection of Laboratory Gloves .....	69
2.11 Selection of Respirator Cartridges and Filters .....	69
2.12 Safety with Nanomaterials.....	69
2.13 Relative Dose Ranges from Ionizing Radiation.....	73
2.14 Magnetic Field Safety .....	75
2.15 Miscellaneous Hazardous Conditions and Fire Safety .....	76
2.15.1 Fire Extinguishers .....	77
2.15.2 Hot Work Permits .....	78
2.16 Stop Work Orders .....	78
References.....	80
Chapter 3	
Introduction to Spectroscopy .....	81
3.1 Interaction between Electromagnetic Radiation and Matter .....	81
3.1.1 What Is Electromagnetic Radiation? .....	81
3.1.2 How Does Electromagnetic Radiation Interact with Matter? .....	82
3.2 Atoms and Atomic Spectroscopy.....	86
3.3 Molecules and Molecular Spectroscopy .....	87
3.3.1 Rotational Transitions in Molecules .....	87
3.3.2 Vibrational Transitions in Molecules.....	88
3.3.3 Electronic Transitions in Molecules .....	88
3.4 Absorption Laws.....	89
3.4.1 Deviations from Beer's Law .....	91
3.5 Methods of Calibration .....	92
3.5.1 Calibration with Standards .....	92
3.5.2 Method of Standard Additions.....	93
3.5.3 Internal Standard Calibration.....	96
3.5.4 Errors Associated with Beer's Law Relationships.....	98
3.6 Optical Systems Used in Spectroscopy .....	100
3.6.1 Radiation Sources .....	101
3.6.2 Wavelength Selection Devices.....	102

3.6.2.1	Filters .....	102
3.6.2.2	Monochromator.....	102
3.6.2.3	Resolution Required to Separate Two Lines of Different Wavelengths.....	104
3.6.3	Optical Slits .....	108
3.6.4	Detectors .....	110
3.6.5	Single-Beam and Double-Beam Optics.....	110
3.6.6	Dispersive Optical Layouts.....	112
3.6.7	Fourier Transform Spectrometers .....	113
3.6.7.1	Advantages of FT Systems .....	114
3.7	Spectroscopic Technique and Instrument Nomenclature.....	115
	Suggested Experiments.....	115
	Problems .....	116
	Bibliography .....	118
Chapter 4		
	Visible and Ultraviolet Molecular Spectroscopy .....	119
4.1	Introduction.....	119
4.1.1	Electronic Excitation in Molecules.....	122
4.1.2	Absorption by Molecules.....	124
4.1.3	Molar Absorptivity.....	125
4.1.4	Shape of UV Absorption Curves .....	125
4.1.5	Solvents for UV/VIS Spectroscopy .....	128
4.2	Instrumentation .....	129
4.2.1	Optical System.....	129
4.2.2	Radiation Sources .....	130
4.2.3	Monochromators.....	132
4.2.4	Detectors .....	132
4.2.4.1	Barrier Layer Cell .....	133
4.2.4.2	Photomultiplier Tube .....	134
4.2.4.3	Semiconductor Detectors: Diodes and Diode Array Systems.....	135
4.2.4.4	Diodes .....	136
4.2.4.5	Diode Arrays .....	137
4.2.5	Sample Holders.....	138
4.2.5.1	Liquid and Gas Cells.....	138
4.2.5.2	Matched Cells .....	139
4.2.5.3	Flow-Through Samplers .....	140
4.2.5.4	Solid Sample Holders .....	140
4.2.5.5	Fiber-Optic Probes .....	141
4.2.6	Microvolume, Nanovolume, and Handheld UV/VIS Spectrometers.....	141
4.2.6.1	Microvolume Systems.....	142
4.2.6.2	Variable Path Length Slope Spectroscopy™ System.....	143
4.2.6.3	Handheld Visible Spectroscopy System.....	147
4.3	UV Absorption Spectra of Molecules.....	150
4.3.1	Solvent Effects on UV Spectra .....	150
4.3.1.1	Bathochromic or Red Shift .....	150
4.3.1.2	Hypsochromic or Blue Shift .....	151
4.4	UV Spectra and the Structure of Organic Molecules .....	152
4.4.1	Conjugated Diene Systems.....	152
4.4.2	Conjugated Ketone Systems .....	154
4.4.3	Substitution of Benzene Rings.....	156
4.5	Analytical Applications .....	156
4.5.1	Qualitative Structural Analysis .....	156
4.5.2	Quantitative Analysis.....	157
4.5.3	Multicomponent Determinations .....	162
4.5.4	Other Applications .....	162

	4.5.4.1	Reaction Kinetics.....	162
	4.5.4.2	Spectrophotometric Titrations.....	163
	4.5.4.3	Spectroelectrochemistry.....	163
	4.5.4.4	Analysis of Solids.....	164
	4.5.5	Measurement of Color.....	164
4.6		Accuracy and Precision in UV/VIS Absorption Spectrometry.....	166
4.7		Nephelometry and Turbidimetry.....	166
4.8		Molecular Emission Spectrometry.....	167
	4.8.1	Fluorescence and Phosphorescence.....	167
	4.8.2	Relationship between Fluorescence Intensity and Concentration.....	169
4.9		Instrumentation for Luminescence Measurements.....	170
	4.9.1	Wavelength Selection Devices.....	170
	4.9.2	Radiation Sources.....	171
	4.9.3	Detectors.....	172
	4.9.4	Sample Cells.....	173
	4.9.5	Spectrometer Systems.....	173
4.10		Analytical Applications of Luminescence.....	173
	4.10.1	Advantages of Fluorescence and Phosphorescence.....	175
	4.10.2	Disadvantages of Fluorescence and Phosphorescence.....	175
		Suggested Experiments.....	176
		Problems.....	177
		Bibliography.....	180
 Chapter 5			
		Infrared, Near-Infrared, Raman, and Photoacoustic Spectroscopy.....	183
5.1		Absorption of IR Radiation by Molecules.....	184
	5.1.1	Dipole Moments in Molecules.....	184
	5.1.2	Types of Vibrations in Molecules.....	185
	5.1.3	Vibrational Motion.....	187
5.2		IR Instrumentation.....	190
	5.2.1	Radiation Sources.....	190
	5.2.1.1	Mid-IR Sources.....	191
	5.2.1.2	NIR Sources.....	193
	5.2.1.3	Far-IR Sources.....	193
	5.2.1.4	IR Laser Sources.....	193
	5.2.2	Monochromators and Interferometers.....	194
	5.2.2.1	FT Spectrometers.....	194
	5.2.2.2	Interferometer Components.....	197
	5.2.3	Detectors.....	198
	5.2.3.1	Bolometer.....	198
	5.2.3.2	Thermocouples.....	199
	5.2.3.3	Thermistors.....	199
	5.2.3.4	Golay Detector.....	199
	5.2.3.5	Pyroelectric Detectors.....	199
	5.2.3.6	Photon Detectors.....	200
	5.2.4	Detector Response Time.....	200
5.3		Sampling Techniques.....	201
	5.3.1	Techniques for Transmission (Absorption) Measurements.....	201
	5.3.1.1	Solid Samples.....	201
	5.3.1.2	Liquid Samples.....	202
	5.3.1.3	Gas Samples.....	204
	5.3.2	Background Correction in Transmission Measurements.....	205
	5.3.2.1	Solvent Absorption.....	205
	5.3.2.2	Air Absorption.....	205
	5.3.3	Techniques for Reflectance and Emission Measurements.....	206

	5.3.3.1	Attenuated Total Reflectance .....	206
	5.3.3.2	Specular Reflectance .....	208
	5.3.3.3	Diffuse Reflectance .....	209
	5.3.3.4	IR Emission.....	209
5.4		FTIR Microscopy.....	210
5.5		Nondispersive IR Systems .....	214
5.6		Analytical Applications of IR Spectroscopy.....	214
	5.6.1	Qualitative Analyses and Structural Determination by Mid-IR Absorption Spectroscopy .....	215
	5.6.1.1	Hydrocarbons.....	218
	5.6.1.2	Organic Compounds with C–O Bonds.....	222
	5.6.1.3	Nitrogen-Containing Organic Compounds .....	227
	5.6.1.4	Functional Groups Containing Heteroatoms .....	228
	5.6.2	Quantitative Analyses by IR Spectrometry.....	233
5.7		NIR Spectroscopy.....	236
	5.7.1	Instrumentation.....	236
	5.7.2	NIR Vibrational Bands, Spectral Interpretation, and Calibration .....	236
	5.7.2.1	NIR Calibration: Chemometrics .....	238
	5.7.3	Sampling Techniques for NIR Spectroscopy .....	238
	5.7.3.1	Liquids and Solutions .....	239
	5.7.3.2	Solids.....	240
	5.7.3.3	Gases .....	240
	5.7.4	Applications of NIR Spectroscopy .....	240
5.8		Raman Spectroscopy .....	242
	5.8.1	Principles of Raman Scattering .....	242
	5.8.2	Raman Instrumentation.....	244
	5.8.2.1	Light Sources .....	244
	5.8.2.2	Dispersive Spectrometer Systems .....	245
	5.8.2.3	FT-Raman Spectrometers.....	246
	5.8.2.4	Fiber-Optic-Based Modular and Handheld Systems .....	246
	5.8.2.5	Samples and Sample Holders for Raman Spectroscopy .....	249
	5.8.3	Applications of Raman Spectroscopy.....	249
	5.8.4	Resonance Raman Effect.....	254
	5.8.5	Surface-Enhanced Raman Spectroscopy .....	254
	5.8.6	Raman Microscopy .....	255
5.9		Chemical Imaging Using NIR, IR, and Raman Spectroscopy.....	256
5.10		Photoacoustic Spectroscopy .....	262
		Inset: Alexander Graham Bell.....	265
		Suggested Experiments.....	266
		Problems .....	268
		Bibliography .....	273
		Spectral Databases .....	275
Chapter 6			
		Magnetic Resonance Spectroscopy.....	277
6.1		Introduction to Nuclear Magnetic Resonance Spectroscopy.....	277
	6.1.1	Properties of Nuclei.....	278
	6.1.2	Quantization of <sup>1</sup> H Nuclei in a Magnetic Field .....	279
	6.1.2.1	Saturation and Magnetic Field Strength .....	281
	6.1.3	Width of Absorption Lines.....	284
	6.1.3.1	Homogeneous Field .....	284
	6.1.3.2	Relaxation Time .....	284
	6.1.3.3	The Chemical Shift .....	285
	6.1.3.4	Magic Angle Spinning .....	285
	6.1.3.5	Other Sources of Line Broadening .....	286
6.2		FT-NMR Experiment.....	287

5.3.3.1	Attenuated Total Reflectance .....	206
5.3.3.2	Specular Reflectance .....	208
5.3.3.3	Diffuse Reflectance .....	209
5.3.3.4	IR Emission .....	209
5.4	FTIR Microscopy .....	210
5.5	Nondispersive IR Systems .....	214
5.6	Analytical Applications of IR Spectroscopy .....	214
5.6.1	Qualitative Analyses and Structural Determination by Mid-IR Absorption Spectroscopy .....	215
5.6.1.1	Hydrocarbons .....	218
5.6.1.2	Organic Compounds with C–O Bonds .....	222
5.6.1.3	Nitrogen-Containing Organic Compounds .....	227
5.6.1.4	Functional Groups Containing Heteroatoms .....	228
5.6.2	Quantitative Analyses by IR Spectrometry .....	233
5.7	NIR Spectroscopy .....	236
5.7.1	Instrumentation .....	236
5.7.2	NIR Vibrational Bands, Spectral Interpretation, and Calibration .....	236
5.7.2.1	NIR Calibration: Chemometrics .....	238
5.7.3	Sampling Techniques for NIR Spectroscopy .....	238
5.7.3.1	Liquids and Solutions .....	239
5.7.3.2	Solids .....	240
5.7.3.3	Gases .....	240
5.7.4	Applications of NIR Spectroscopy .....	240
5.8	Raman Spectroscopy .....	242
5.8.1	Principles of Raman Scattering .....	242
5.8.2	Raman Instrumentation .....	244
5.8.2.1	Light Sources .....	244
5.8.2.2	Dispersive Spectrometer Systems .....	245
5.8.2.3	FT-Raman Spectrometers .....	246
5.8.2.4	Fiber-Optic-Based Modular and Handheld Systems .....	246
5.8.2.5	Samples and Sample Holders for Raman Spectroscopy .....	249
5.8.3	Applications of Raman Spectroscopy .....	249
5.8.4	Resonance Raman Effect .....	254
5.8.5	Surface-Enhanced Raman Spectroscopy .....	254
5.8.6	Raman Microscopy .....	255
5.9	Chemical Imaging Using NIR, IR, and Raman Spectroscopy .....	256
5.10	Photoacoustic Spectroscopy .....	262
	Inset: Alexander Graham Bell .....	265
	Suggested Experiments .....	266
	Problems .....	268
	Bibliography .....	273
	Spectral Databases .....	275
Chapter 6		
	Magnetic Resonance Spectroscopy .....	277
6.1	Introduction to Nuclear Magnetic Resonance Spectroscopy .....	277
6.1.1	Properties of Nuclei .....	278
6.1.2	Quantization of <sup>1</sup> H Nuclei in a Magnetic Field .....	279
6.1.2.1	Saturation and Magnetic Field Strength .....	281
6.1.3	Width of Absorption Lines .....	284
6.1.3.1	Homogeneous Field .....	284
6.1.3.2	Relaxation Time .....	284
6.1.3.3	The Chemical Shift .....	285
6.1.3.4	Magic Angle Spinning .....	285
6.1.3.5	Other Sources of Line Broadening .....	286
6.2	FT-NMR Experiment .....	287

6.3	Chemical Shifts.....	287
6.4	Spin-Spin Coupling.....	291
6.5	Instrumentation.....	302
6.5.1	Sample Holder.....	302
6.5.2	Sample Probe.....	305
6.5.2.1	Cryogenically Cooled Probes.....	305
6.5.3	Magnet.....	305
6.5.4	RF Generation and Detection.....	308
6.5.5	Signal Integrator and Computer.....	309
6.6	Analytical Applications of NMR.....	309
6.6.1	Samples and Sample Preparation for NMR.....	309
6.6.2	Qualitative Analyses: Molecular Structure Determination.....	310
6.6.2.1	Relationship between the Area of a Peak and Molecular Structure.....	310
6.6.2.2	Chemical Exchange.....	311
6.6.2.3	Double-Resonance Experiments.....	312
6.6.3	Interpretation of Proton Spectra.....	313
6.6.3.1	Aliphatic Alkanes, Alkenes, Alkynes, and Alkyl Halides.....	315
6.6.3.2	Aromatic Compounds.....	319
6.6.3.3	Oxygen-Containing Organic Compounds.....	321
6.6.3.4	Nitrogen-Containing Organic Compounds.....	321
6.6.4	$^{13}\text{C}$ NMR.....	324
6.6.4.1	Heteronuclear Decoupling.....	326
6.6.4.2	Nuclear Overhauser Effect.....	326
6.6.4.3	$^{13}\text{C}$ NMR Spectra of Solids.....	328
6.6.4.4	Interpretation of $^{13}\text{C}$ Spectra.....	330
6.6.5	2D NMR.....	332
6.6.6	Qualitative Analyses: Other Applications.....	335
6.6.7	Quantitative Analyses.....	338
6.7	Hyphenated NMR Techniques.....	342
6.8	NMR Imaging and MRI.....	343
6.9	Time Domain NMR.....	347
6.9.1	Solid Fat Content Determination by TD-NMR.....	348
6.9.2	Field Homogeneity and Spin Echo.....	349
6.9.3	Relaxation Time Distribution.....	351
6.9.4	TD-NMR Applications.....	352
6.10	Low-Field, Portable, and Miniature NMR Instruments.....	353
6.11	Limitations of NMR.....	353
6.12	Electron Spin Resonance Spectroscopy.....	353
6.12.1	Instrumentation.....	356
6.12.1.1	Samples and Sample Holders.....	357
6.12.2	Miniature ESR Spectroscopy.....	358
6.12.3	ESR Spectra and Hyperfine Interactions.....	360
6.12.4	Applications.....	361
6.12.4.1	Spin Labels and Spin Traps.....	363
6.12.5	CW-ENDOR.....	364
	Suggested Experiments.....	366
	Problems.....	366
	Bibliography.....	372
	Spectral Databases.....	373
Chapter 7		
	Atomic Absorption Spectrometry.....	375
7.1	Absorption of Radiant Energy by Atoms.....	375
7.1.1	Spectral Linewidth.....	377
7.1.2	Degree of Radiant Energy Absorption.....	377

7.2	Instrumentation.....	377
7.2.1	Radiation Sources.....	378
7.2.1.1	Hollow Cathode Lamp.....	378
7.2.1.2	Electrodeless Discharge Lamp.....	379
7.2.2	Atomizers.....	380
7.2.2.1	Flame Atomizers.....	380
7.2.2.2	Electrothermal Atomizers.....	382
7.2.2.3	Other Atomizers.....	384
7.2.3	Spectrometer Optics.....	384
7.2.3.1	Monochromator.....	384
7.2.3.2	Optics and Spectrometer Configuration.....	384
7.2.4	Detectors.....	386
7.2.5	Modulation.....	386
7.2.6	Commercial AAS Systems.....	386
7.2.6.1	High-Resolution Continuum Source AAS.....	387
7.3	Atomization Process.....	387
7.3.1	Flame Atomization.....	387
7.3.2	Graphite Furnace Atomization.....	391
7.4	Interferences in AAS.....	392
7.4.1	Nonspectral Interferences.....	392
7.4.1.1	Chemical Interference.....	392
7.4.1.2	Matrix Interference.....	393
7.4.1.3	Ionization Interference.....	394
7.4.1.4	Nonspectral Interferences in GFAAS.....	394
7.4.1.5	Chemical Modification.....	395
7.4.2	Spectral Interferences.....	397
7.4.2.1	Atomic Spectral Interference.....	397
7.4.2.2	Background Absorption and Its Correction.....	397
7.4.2.3	Two-Line Background Correction.....	397
7.4.2.4	Continuum Source Background Correction.....	397
7.4.2.5	Zeeman Background Correction.....	399
7.4.2.6	Smith-Hieftje Background Corrector.....	400
7.4.2.7	Spectral Interferences in GFAAS.....	401
7.5	Analytical Applications of AAS.....	402
7.5.1	Qualitative Analysis.....	402
7.5.2	Quantitative Analysis.....	402
7.5.2.1	Quantitative Analytical Range.....	402
7.5.2.2	Calibration.....	403
7.5.3	Analysis of Samples.....	404
7.5.3.1	Liquid Samples.....	404
7.5.3.2	Solid Samples.....	405
7.5.3.3	Gas Samples.....	407
7.5.3.4	Cold Vapor Mercury Technique.....	407
7.5.3.5	Hydride Generation Technique.....	408
7.5.3.6	Flow Injection Analysis.....	408
7.5.3.7	Flame Microsampling.....	409
	Suggested Experiments.....	409
	Problems.....	410
	7.A Appendix.....	411
	7.B Appendix.....	415
	Bibliography.....	418
	Chapter 8	
	Atomic Emission Spectroscopy.....	421
8.1	Flame Atomic Emission Spectroscopy.....	421

8.1.1	Instrumentation for Flame OES.....	422
8.1.1.1	Burner Assembly.....	422
8.1.1.2	Wavelength Selection Devices.....	423
8.1.1.3	Detectors.....	424
8.1.1.4	Flame Excitation Source.....	424
8.1.2	Interferences.....	425
8.1.2.1	Chemical Interference.....	425
8.1.2.2	Excitation and Ionization Interferences.....	426
8.1.2.3	Spectral Interferences.....	426
8.1.3	Analytical Applications of Flame OES.....	427
8.1.3.1	Qualitative Analysis.....	427
8.1.3.2	Quantitative Analysis.....	427
8.2	Atomic OES.....	429
8.2.1	Instrumentation for Emission Spectroscopy.....	430
8.2.1.1	Electrical Excitation Sources.....	431
8.2.1.2	Sample Holders.....	435
8.2.1.3	Spectrometers.....	435
8.2.1.4	Detectors.....	437
8.2.2	Interferences in Arc and Spark Emission Spectroscopy.....	441
8.2.2.1	Matrix Effects and Sample Preparation.....	441
8.2.2.2	Spectral Interference.....	442
8.2.2.3	Internal Standard Calibration.....	442
8.2.3	Applications of Arc and Spark Emission Spectroscopy.....	443
8.2.3.1	Qualitative Analysis.....	443
8.2.3.2	Raies Ultimes.....	443
8.2.3.3	Quantitative Analysis.....	443
8.3	Plasma Emission Spectroscopy.....	446
8.3.1	Instrumentation for Plasma Emission Spectrometry.....	446
8.3.1.1	Excitation Sources.....	446
8.3.1.2	Spectrometer Systems for ICP, DCP, and MP.....	451

## Chapter 9

X-Ray Spectroscopy .....	489
--------------------------	-----

**Contributing authors: Alexander Seyfarth and Eileen Skelly Frame**

9.1	Origin of X-Ray Spectra.....	489
9.1.1	Energy Levels in Atoms.....	489
9.1.2	Moseley's Law .....	494
9.1.3	X-Ray Methods.....	494
9.1.3.1	X-Ray Absorption Process .....	495
9.1.3.2	X-Ray Fluorescence Process.....	496
9.1.3.3	X-Ray Diffraction Process .....	496
9.2	X-Ray Fluorescence.....	498
9.2.1	X-Ray Source.....	499
9.2.1.1	X-Ray Tube.....	499
9.2.1.2	Secondary XRF Sources .....	501
9.2.1.3	Radioisotope Sources.....	501
9.2.2	Instrumentation for Energy-Dispersive X-Ray Spectrometry .....	504
9.2.2.1	Excitation Source .....	504
9.2.2.2	Primary Beam Modifiers.....	505
9.2.2.3	Sample Holders.....	508
9.2.2.4	EDXRF Detectors .....	511
9.2.2.5	Multichannel Pulse Height Analyzer.....	514
9.2.2.6	Detector Artifact Escape Peaks and Sum Peaks .....	515
9.2.3	Instrumentation for Wavelength-Dispersive X-Ray Spectrometry .....	516
9.2.3.1	Collimators.....	516
9.2.3.2	Analyzing Crystals.....	516
9.2.3.3	Detectors .....	521
9.2.3.4	Electronic Pulse Processing Units .....	525
9.2.3.5	Sample Changers .....	527
9.2.4	Simultaneous WDXRF Spectrometers .....	527
9.2.5	Micro-XRF Instrumentation .....	528
9.2.5.1	Micro-X-Ray Beam Optics .....	528
9.2.5.2	Micro-XRF System Components.....	529
9.2.6	Total Reflection XRF .....	530
9.2.7	Comparison between EDXRF and WDXRF .....	530
9.2.8	XRF Applications .....	531
9.2.8.1	Analyzed Layer.....	531
9.2.8.2	Sample Preparation Considerations for XRF.....	533
9.2.8.3	Qualitative Analysis by XRF .....	534

	9.2.8.4	Quantitative Analysis by XRF .....	539
	9.2.8.5	Applications of Quantitative XRF .....	541
9.3		X-Ray Absorption .....	542
	9.3.1	EXAFS .....	546
9.4		X-Ray Diffraction .....	546
	9.4.1	Single-Crystal X-Ray Diffractometry .....	548
	9.4.2	Crystal Growing .....	549
	9.4.3	Crystal Structure Determination .....	549
	9.4.4	Powder X-Ray Diffractometry .....	551
	9.4.5	Hybrid XRD/XRF Systems .....	553
	9.4.5.1	Compact and Portable Hybrid Systems .....	553
	9.4.6	Applications of XRD .....	555
	9.4.6.1	Analytical Limitations of XRD .....	556
9.5		X-Ray Emission .....	557
	9.5.1	Electron Probe Microanalysis .....	557
	9.5.2	Particle-Induced X-Ray Emission .....	558
9.6		Commercial X-Ray Instrument Manufacturers .....	558
		Suggested Experiments/Tutorials .....	559
		Problems .....	561
		9.A Appendix: Characteristic X-Ray Wavelengths (Å) and Energies (keV) .....	566
		9.B Appendix: Absorption Edge Wavelengths and Energies .....	571
		Bibliography .....	573
Chapter 10			
		Mass Spectrometry I: Principles and Instrumentation .....	575
10.1		Principles of MS .....	575
	10.1.1	Resolving Power and Resolution of a Mass Spectrometer .....	579
10.2		Instrumentation .....	580
	10.2.1	Sample Input Systems .....	580
	10.2.1.1	Gas Expansion .....	580
		Inset: A Brief Digression on Units of Measure – Vacuum Systems .....	580
	10.2.1.2	Direct Insertion and Direct Exposure Probes .....	581
	10.2.1.3	Chromatography and Electrophoresis Systems .....	581
	10.2.1.4	Chromatography and Infrared Spectrometry Systems Coupled with Mass Spectrometry .....	582
	10.2.2	Ionization Sources .....	582
	10.2.2.1	Electron Ionization .....	582
	10.2.2.2	Chemical Ionization .....	583
	10.2.2.3	Atmospheric Pressure Ionization Sources .....	584
	10.2.2.4	Desorption Ionization .....	586
	10.2.2.5	Ionization Sources for Inorganic MS .....	592
	10.2.3	Mass Analyzers .....	593
	10.2.3.1	Magnetic and Electric Sector Instruments .....	593
	10.2.3.2	Time-of-Flight Analyzer .....	596
	10.2.3.3	Quadrupole Mass Analyzer .....	601
	10.2.3.4	MS/MS and MS <sup>n</sup> Instruments .....	603
	10.2.3.5	Quadrupole Ion Trap .....	605
	10.2.3.6	Fourier Transform Ion-Cyclotron Resonance .....	606
	10.2.3.7	Orbitrap MS .....	607
	10.2.4	Detectors .....	608
	10.2.4.1	Electron Multiplier .....	609
	10.2.4.2	Faraday Cup .....	610
	10.2.4.3	Array Detectors .....	611

10.3	Ion Mobility Spectrometry .....	611
10.3.1	Handheld DMS JUNO® Chemical Trace Vapor Point Detector .....	613
10.3.2	Excellims HPIMS-LC System .....	613
10.3.3	Photonis Ion Mobility Spectrometer Engine .....	613
10.3.4	SYNAPT G2-S Multistage MS System Incorporating the TriWAVE Ion Mobility Stage .....	613
10.4	Leaks in Mass Spectrometer Systems .....	615
	Problems .....	616
	Bibliography .....	617
Chapter 11		
	Mass Spectrometry II: Spectral Interpretation and Applications .....	619
11.1	Interpretation of Mass Spectra: Structural Determination of Simple Molecules .....	619
11.1.1	Molecular Ion and Fragmentation Patterns .....	621
11.1.2	Nitrogen Rule .....	623
11.1.3	Molecular Formulas and Isotopic Abundances .....	623
11.1.3.1	Counting Carbon Atoms .....	624
11.1.3.2	Counting Carbon, Nitrogen, and Sulfur Atoms .....	625
11.1.3.3	Counting Oxygen Atoms .....	625
11.1.4	Compounds with Heteroatoms .....	626
11.1.5	Halogen Isotopic Clusters .....	627
11.1.6	Rings Plus Double Bonds .....	630
11.1.7	Common Mass Losses on Fragmentation .....	631
11.2	Mass Spectral Interpretation: Some Examples .....	631
11.2.1	Mass Spectra of Hydrocarbons .....	635
11.2.2	Mass Spectra of Other Organic Compound Classes .....	640
11.2.2.1	Alcohols .....	640
11.2.2.2	Ethers .....	642
11.2.2.3	Ketones and Aldehydes .....	642
11.2.2.4	Carboxylic Acids and Esters .....	645
11.2.3	Compounds Containing Heteroatoms .....	646
11.2.3.1	Nitrogen-Containing Compounds .....	646
11.2.3.2	Sulfur-Containing Compounds .....	647
11.3	Applications of Molecular MS .....	649
11.3.1	High-Resolution Mass Spectrometry .....	649
11.3.1.1	Achieving Higher Mass Accuracy (but Not Resolution) from Low-Resolution MS Instruments .....	650
11.3.1.2	Improving the Quantitation Accuracy of Isotope Ratios from Low-Resolution MS Instrument Data Files .....	651
11.3.2	Quantitative Analysis of Compounds and Mixtures .....	652
11.3.3	Protein-Sequencing Analysis (Proteomics) .....	654
11.3.4	Gas Analysis .....	655
11.3.5	Environmental Applications .....	655
11.3.6	Other Applications of Molecular MS .....	657
11.3.7	Limitations of Molecular MS .....	657
11.4	Atomic MS .....	657
11.4.1	ICP-MS .....	657
11.4.2	Applications of Atomic MS .....	660
11.4.2.1	Geological and Materials Characterization Applications .....	661
11.4.2.2	Speciation by Coupled Chromatography-ICP-MS .....	663
11.4.2.3	Applications in Food Chemistry, Environmental Chemistry, Biochemistry, Clinical Chemistry, and Medicine .....	664
11.4.2.4	Coupled Elemental Analysis MS .....	666
11.4.3	Interferences in Atomic MS .....	666
11.4.3.1	Matrix Effects .....	666

11.4.3.2	Spectral (Isobaric) Interferences .....	667
11.4.4	Instrumental Approaches to Eliminating Interferences .....	670
11.4.4.1	High-Resolution ICP-MS (HR-ICP-MS).....	670
11.4.4.2	Collision and Reaction Cells.....	670
11.4.4.3	MS/MS Interference Removal .....	671
11.4.5	Limitations of Atomic MS .....	672
11.5	Common Spurious Effects in Mass Spectrometry.....	674
	Problems .....	674
	11.A Appendix .....	682
	Bibliography .....	684
 Chapter 12		
	Principles of Chromatography .....	687
12.1	Introduction to Chromatography .....	687
12.2	The Nature of Mixtures .....	688
12.3	What Is the Chromatographic Process?.....	691
12.4	Chromatography in More than One Dimension .....	692
12.5	Visualization of the Chromatographic Process at the Molecular Level: Analogy to “People on a Moving Belt Slideway”.....	693
12.6	Digression on the Central Role of Silicon–Oxygen Compounds in Chromatography .....	696
12.7	Basic Equations Describing Chromatographic Separations .....	698
12.8	How Do Column Variables Affect Efficiency (Plate Height)?.....	701
12.9	Practical Optimization of Chromatographic Separations .....	702
12.10	Extra-Column Band Broadening Effects .....	703
12.11	Qualitative Chromatography: Analyte Identification.....	704
12.12	Quantitative Measurements in Chromatography .....	704
12.12.1	Peak Area or Peak Height: What Is Best for Quantitation?.....	705
12.12.2	Calibration with an External Standard.....	705
12.12.3	Calibration with an Internal Standard.....	706
12.13	Examples of Chromatographic Calculations .....	707
	Problems .....	708
	Bibliography .....	709
 Chapter 13		
	Gas Chromatography .....	711
13.1	Historical Development of GC: The First Chromatographic Instrumentation .....	711
13.2	Advances in GC Leading to Present-Day Instrumentation.....	712
13.3	GC Instrument Component Design (Injectors).....	713
13.3.1	Syringes .....	713
13.3.2	Autosamplers.....	714
13.3.3	SPME.....	714
13.3.4	Split Injections .....	715
13.3.5	Splitless Injections .....	715
13.4	GC Instrument Component Design (the Column).....	716
13.4.1	Column Stationary Phase.....	716
13.4.2	Selecting a Stationary Phase for an Application.....	719
13.4.3	Effects of Mobile Phase Choice and Flow Parameters.....	721
13.5	GC Instrument Operation (Column Dimensions and Elution Values).....	722
13.6	GC Instrument Operation (Column Temperature and Elution Values).....	724
13.7	GC Instrument Component Design (Detectors) .....	728
13.7.1	Thermal Conductivity Detector .....	730
13.7.2	Flame Ionization Detector .....	730
13.7.3	Electron Capture Detector .....	732
13.7.4	Electrolytic Conductivity Detector .....	734

13.7.5	Sulfur–Phosphorus Flame Photometric Detector .....	734
13.7.6	Sulfur Chemiluminescence Detector .....	734
13.7.7	Nitrogen–Phosphorus Detector .....	735
13.7.8	Photoionization Detector .....	735
13.7.9	Helium Ionization Detector .....	736
13.7.10	Atomic Emission Detector .....	737
13.8	Hyphenated GC Techniques (GC-MS, GC-IR, GC-GC, or 2D GC) .....	737
13.8.1	GC-MS .....	737
13.8.2	GC-IR Spectrometry .....	740
13.8.3	Comprehensive 2D Gas Chromatography (GC × GC or GC <sup>2</sup> ) .....	740
13.9	Retention Indices (A Generalization of Relative R <sub>t</sub> Information) .....	743
13.10	Scope of GC Analyses .....	744
13.10.1	GC Behavior of Organic Compound Classes .....	744
13.10.2	Derivatization of Difficult Analytes to Improve GC Elution Behavior .....	744
13.10.3	Gas Analysis by GC .....	745
13.10.4	Limitations of GC .....	746
	Problems .....	746
13.A	Appendix: GC Internet Web Resources .....	748
	Bibliography .....	749
Chapter 14		
	Chromatography with Liquid (and Fluid) Mobile Phases .....	751
14.1	High-Performance Liquid Chromatography .....	751
14.1.1	HPLC Column and Stationary Phases .....	751
14.1.1.1	Support Particle Considerations .....	753
14.1.1.2	Stationary-Phase Considerations .....	755
14.1.1.3	Chiral Phases for Separation of Enantiomers .....	755
14.1.2	Effects on Separation of Composition of the Mobile Phase .....	756
14.1.2.1	New HPLC-Phase Combinations for Assays of Very Polar Biomolecules .....	757
14.1.2.2	Ion-Exchange Chromatography .....	758
14.1.2.3	Hydrophilic Interaction Liquid Chromatography .....	758
