List of boxes	xxiv
Preface	xxvii
Acknowledgments	xxviii
List of abbreviations	xxix
1 Introduction to the economics of agriculture	1
1.0 Introduction	2
1.1 Economics is important and interesting!	3
1.1.1 Meat processing	5
1.1.2 Free trade among nations	6
1.1.3 The environment	7
1.1.4 Agricultural chemicals	7
1.2 What is economics, and what is it about?	8
1.2.1 Producers and consumers	8
1.2.2 Macroeconomics and microeconomics	9
1.2.3 Positive and normative economics	9
1.3 Scarcity	10
1.4 The economic organization of society	11
1.4.1 Resources	11
1.5 A model of an economy	13
1.6 Trends in the agricultural economy	15
1.6.1 Fewer and larger farms	15
1.6.2 Agriculture is not just farming	15
1.6.3 Substitution of capital for labor	16
1.6.4 Off-farm income for farm families has increased	16
1.6.5 Exports are increasingly important to the agricultural sector	17
1.6.6 Demand for fresh fruit and vegetables	17
1.7 Using graphs	18

1.8	Absolute and relative prices	19
1.8.1	The difference between absolute and relative prices	19
1.8.2	Price units	21
1.8.3	Constant-quality prices	22
1.9	Examples of graphs	22
1.9.1	A graph of the demand for hamburger in Miami, Florida	22
1.9.2	The slope of a line	24
1.9.3	Example: veterinary clinic in Milwaukee, Wisconsin	25
1.10	Chapter 1 Summary	26
1.11	Chapter 1 Glossary	27
1.12	Chapter 1 Review questions	28
2	The economics of production	31
2.1	The production function	32
2.1.1	Wheat production in the high plains of North Dakota	32
2.1.2	Profit maximization	39
2.2	Length of time: immediate run, short run, and long run	41
2.2.1	Immediate, short, and long runs	41
2.2.2	Fixed and variable inputs	42
2.3	Physical production relationships	42
2.3.1	Constant, increasing, decreasing, and negative returns	44
2.3.2	A typical production function	47
2.3.3	Total physical product	48
2.3.4	Average physical product	48
2.3.5	Marginal physical product	49
2.3.6	The relationship between average and marginal physical product	52
2.3.7	Technological change	53
2.4	The law of diminishing marginal returns	55
2.5	The three stages of production	57
2.6	Chapter 2 Summary	59
2.7	Chapter 2 Glossary	60
2.8	Chapter 2 Review questions	61
3	The costs of production	63
3.1	Profits	64
3.2	Opportunity costs	66
3.2.1	Profits (again!)	67
3.2.2	Accounting profits	67
3.2.3	Economic profits	67
3.2.4	The opportunity cost of a wheat grower near Tulsa, Oklahoma	67

3.3	Costs and output	72
3.3.1	Cost curves	74
3.4	Cost curve example: Vermont dairy farmer	76
3.5	Where do cost curves come from?	81
3.5.1	The relationship between average and marginal costs	83
3.6	Constant, decreasing, and increasing cost curves	84
3.6.1	Constant cost firm	84
3.6.2	Decreasing cost firm	84
3.6.3	Increasing cost firm	87
3.6.4	Typical cost curves revisited	89
3.7	Chapter 3 Summary	89
3.8	Chapter 3 Glossary	89
3.9	Chapter 3 Review questions	90
4	Profit maximization	93
4.0	Introduction	94
4.1	Perfect competition	94
4.1.1	Large number of buyers and sellers	95
4.1.2	Homogeneous product	96
4.1.3	Freedom of entry and exit	96
4.1.4	Perfect information	97
4.2	The profit-maximizing level of input	97
4.2.1	Economics: how to make better decisions	98
4.2.2	A feedlot in Abilene, Texas: physical production	98
4.2.3	Feedlot in Abilene, Texas: value of production	101
4.2.4	Feedlot in Abilene, Texas: marginal analysis	103
4.2.5	Feedlot in Abilene, Texas: change in input price	105
4.2.6	Feedlot in Abilene, Texas: change in output price	106
4.2.7	Graphs of optimal input use	108
4.2.8	Tax on the agrochemical atrazine	110
4.3	The profit-maximizing level of output	111
4.3.1	Profit-maximization using total revenue and total cost curves	111
4.3.2	Profit-maximization using marginal revenue and marginal cost curves	113
4.4	Profits and losses, break-even, and shutdown points	115
4.4.1	The break-even point	117
4.4.2	The shutdown point	118
4.4.3	Example: profit maximization for a catfish producer in Mississippi	120
4.5	Chapter 4 Summary	123
4.6	Chapter 4 Glossary	124
4.7	Chapter 4 Review questions	125

5	Optimal input selection	127
5.0	Introduction	128
5.1	The relationship between inputs	129
5.2	Isoquants	131
5.2.1	Examples of isoquants	132
5.3	Relative prices	132
5.3.1	Examples: choosing the right production techniques	135
5.4	Isoquant types	135
5.4.1	Perfect substitutes	136
5.4.2	Perfect complements	137
5.4.3	Imperfect substitutes	138
5.4.4	Imperfect substitutes example	139
5.5	Optimal input decisions	142
5.5.1	The marginal rate of technical substitution	143
5.5.2	The isocost line	144
5.5.3	Equilibrium: the tangency of the isoquant and the isocost line	145
5.5.4	Example: corn producer near Newton, Iowa	148
5.6	Optimal responses to price changes	149
5.6.1	Price change for the farm implement manufacturer	150
5.6.2	Example: the impact of gambling on input selection in Minnesota	152
5.6.3	Relative prices rule!	153
5.7	Chapter 5 Summary	153
5.8	Chapter 5 Glossary	154
5.9	Chapter 5 Review questions	155
6	Optimal output selection	157
6.0	Introduction	158
6.1	The production possibilities frontier (PPF)	159
6.1.1	The shape of the PPF	160
6.2	The marginal rate of product substitution (MRPS)	162
6.3	The isorevenue line	164
6.4	The optimal output combination	165
6.5	Price changes and the optimal output combination	167
6.6	Review of profit-maximization rules	171
6.6.1	Rule for optimal input use	172
6.6.2	Rule for optimal output production	172
6.6.3	Rule for optimal input combination	172
6.6.4	Rule for optimal output combination	173
6.6.5	Thinking like an economist	173
6.7	Chapter 6 Summary	173

6.8	Chapter 6 Glossary	173
6.9	Chapter 6 Review questions	174
7	Consumer choices	175
7.0	Introduction	176
7.1	Rational behavior	176
7.2	Utility	179
7.2.1	Cardinal and ordinal utility	179
7.2.2	Positive and normative economics	182
7.2.3	Utility, total utility, and marginal utility	182
7.3	The law of diminishing marginal utility	187
7.4	Indifference curves	187
7.4.1	Consumer responses to relative price changes	188
7.4.2	Indifference curves	190
7.4.3	Indifference curve example: pizza and Coke	191
7.4.4	Four properties of indifference curves	192
7.4.5	Indifference curves for substitutes and complements	194
7.5	The marginal rate of substitution	196
7.5.1	The diamond-water paradox	196
7.6	The budget constraint	199
7.7	Consumer equilibrium	202
7.8	The demand for meat in Phoenix, Arizona	203
7.8.1	Consumer equilibrium for the Phoenix consumer	203
7.8.2	An increase in income for the Phoenix consumer	205
7.8.3	The impact of general inflation on the Phoenix consumer	206
7.8.4	The impact of a change in beef prices on the Phoenix consumer	206
7.8.5	The impact of a change in chicken prices on the Phoenix consumer	207
7.8.6	Conclusions for the beef industry based on consumer theory	209
7.9	Chapter 7 Summary	210
7.10	Chapter 7 Glossary	211
7.11	Chapter 7 Review questions	212
8	Supply	215
8.0	Introduction	216
8.1	Supply	216
8.1.1	The individual firm's supply curve	217
8.1.2	The market supply curve	218
8.1.3	The law of supply	220

8.2	The elasticity of supply	223
8.2.1	Elasticity defined	223
8.2.2	Elasticity classifications	223
8.2.3	Own-price and cross-price supply elasticities	226
8.2.4	The relationship between elasticity and slope	226
8.3	Change in supply; change in quantity supplied	228
8.4	Determinants of supply	231
8.4.1	Input prices	231
8.4.2	Technology	232
8.4.3	Prices of related goods	236
8.4.4	Number of sellers	237
8.5	Chapter 8 Summary	239
8.6	Chapter 8 Glossary	240
8.7	Chapter 8 Review questions	241
9	Demand	243
9.0	Introduction	244
9.1	Demand	244
9.1.1	The individual consumer's demand curve for macaroni and cheese in Pittsburgh, Pennsylvania	245
9.1.2	The market demand curve	248
9.1.3	The law of demand	249
9.2	The elasticity of demand	251
9.2.1	The own-price elasticity of demand	254
9.2.2	Responsiveness classifications	259
9.2.3	The elasticity of demand and total revenue	261
9.2.4	Own-price and cross-price demand elasticities	262
9.2.5	The relationship between elasticity and slope	263
9.3	Change in demand; change in quantity demanded	264
9.3.1	Examples of demand changes	266
9.4	Determinants of demand	268
9.4.1	Prices of related goods	269
9.4.2	Income	269
9.4.3	Tastes and preferences	275
9.4.4	Expectations of future prices	277
9.4.5	Population	277
9.5	Chapter 9 Summary	277
9.6	Chapter 9 Glossary	278
9.7	Chapter 9 Review questions	279
10	Markets	281
10.0	Introduction	282
10.1	What is a market?	282
10.2	Market equilibrium	283

10.3 Comparative statics	288
10.3.1 Changes in demand	288
10.3.2 Supply changes	291
10.3.3 Simultaneous supply and demand changes	298
10.4 Mathematical models (optional)	299
10.5 Chapter 10 Summary	302
10.6 Chapter 10 Glossary	302
10.7 Chapter 10 Review questions	303
 11 Government policies	 305
11.0 Introduction	306
11.1 Price policies	307
11.1.1 Price supports	308
11.1.2 Price ceilings	311
11.2 Welfare economics	312
11.2.1 Welfare economics of a price support	314
11.2.2 Welfare economics of a price ceiling	319
11.3 Immigration	322
11.3.1 Welfare analysis of immigration: short run	323
11.3.2 Welfare analysis of immigration: long run	325
11.4 Macroeconomics	326
11.4.1 Macroeconomic basics	327
11.4.2 Money	328
11.4.3 Real and nominal GDP	330
11.4.4 Monetary policy	330
11.4.5 Fiscal policy	332
11.4.6 Macroeconomic policy and agricultural-sector linkages	333
11.5 Food security, hunger, and global poverty	334
11.6 Economic development	338
11.7 Public goods	340
11.8 Mathematical welfare economics of price policies (optional)	342
11.8.1 Mathematical welfare economics of a price support	343
11.8.2 Mathematical welfare economics of a price ceiling	344
11.9 Chapter 11 Summary	345
11.10 Chapter 11 Glossary	346
11.11 Chapter 11 Review questions	347
 12 The competitive firm	 349
12.1 Market structure	350
12.2 Characteristics of perfect competition	352

12.3 The perfectly competitive firm	353
12.3.1 The demand curve facing a competitive firm	353
12.3.2 Profit maximization for a competitive firm	356
12.4 The efficiency of competitive industries	357
12.5 Strategies for perfectly competitive firms	363
12.6 Chapter 12 Summary	365
12.7 Chapter 12 Glossary	366
12.8 Chapter 12 Review questions	366
 13 Market power	 369
13.1 Market power	370
13.2 Monopoly	371
13.3 Monopolistic competition	381
13.4 Oligopoly	384
13.4.1 Cartels	385
13.5 Is big necessarily bad?	389
13.6 Game theory	390
13.6.1 Price game	392
13.6.2 Firm location decision: a game that brings firms together	394
13.7 Chapter 13 Summary	395
13.8 Chapter 13 Glossary	396
13.9 Chapter 13 Review questions	396
 14 Agriculture and the global economy	 399
14.1 Globalization and agriculture	400
14.2 Interdependence and gains from trade	405
14.3 Gains from trade example: Oklahoma beef and wheat	406
14.4 The principle of comparative advantage	410
14.5 Comparative advantage and trade	414
14.6 The motivation for and consequences of free trade	417
14.7 Three-panel diagram of international trade	420
14.8 Labor immigration into the US from Mexico	422
14.9 Exchange rates and transportation costs	423
14.10 Chapter 14 Summary	425
14.11 Chapter 14 Glossary	426
14.12 Chapter 14 Review questions	427
 15 Economics, agriculture, and the environment	 429
15.0 Introduction	430
15.1 The tragedy of the commons	432
15.2 Externality	435
15.3 Private bargaining: Coase	440
15.4 Chapter 15 Summary	443

15.5 Chapter 15 Glossary	443
15.6 Chapter 15 Review questions	444
16 Farm and agribusiness management	445
16.1 The food supply chain	446
16.1.1 The farm service sector	446
16.1.2 The producer sector	447
16.1.3 The processor sector	447
16.1.4 The marketing sector	448
16.2 Farm and agribusiness management	448
16.2.1 The functions of management	449
16.2.2 Strategic planning and management	449
16.3 Agricultural and food marketing	450
16.3.1 Risk and uncertainty	450
16.3.2 Futures markets	453
16.4 Agricultural finance	456
16.4.1 The opportunity cost of time	456
16.4.2 Compounding and discounting	457
16.4.3 Net present value	458
16.5 Chapter 16 Summary	459
16.6 Chapter 16 Glossary	460
16.7 Chapter 16 Review questions	461
Glossary	463
Index	473
