PART 1 Genetically modified food

CHAPTER 1	Why is genetic modification of interest or why can it be useful?.....	3
	<i>Endre Máthé, PhD and Maria-Mihaela Antofie</i>	
	Concluding remarks.....	18
	References.....	21
	Further reading.....	25
CHAPTER 2	A perspective on the evolution of genetic manipulation of biological materials, both plant and animal.....	27
	<i>J.M. Regenstein</i>	
	Religious viewpoints.....	36
	References.....	38
CHAPTER 3	How are genes modified? Crossbreeding, mutagenesis, and CRISPR-Cas9.....	39
	<i>Marie-Laurence Lemay, PhD and Sylvain Moineau</i>	
	Introduction.....	40
	The microbial origin of CRISPR-Cas9.....	41
	Programmable DNA cleavage.....	43
	Specificity.....	44
	Repairing the cut.....	45
	Plant transformation.....	48
	Conclusion.....	50
	References.....	50
CHAPTER 4	Can genetic modification go wrong, and what if it does?.....	55
	<i>Wayne A. Parrott, BS, MS, PhD</i>	
	Images of genetic modification going wrong.....	55
	Modification and food safety.....	56
	Environmental concerns.....	60
	Summary.....	63
	References.....	64

CHAPTER 5 GM food and human health.....69*R. Blair, BSc, PhD, DSc and J.M. Regenstein*

Introduction.....	69
Evidence on safety.....	69
GM foods likely to be eaten directly by consumers	70
Fruits and vegetables.....	70
Cereal crops.....	73
Oilseed crops.....	75
Allergenicity and toxicity.....	76
Fate of GM proteins in the gastrointestinal tract and absorption into bodily tissues.....	77
Chemical residues.....	81
Microorganisms.....	83
GM animals.....	83
Foods derived from animals fed diets containing GM feedstuffs	84
Consensus on safety.....	84
Health benefits of GM crops.....	88
Addressing consumer concerns	90
Conclusions.....	91
References.....	92
Further reading.....	98

Case studies**CHAPTER 6.1 Genetically modified (GM) food in South Africa..... 101***Jan-Hendrik Groenewald, BSc, BSc(Hons), MSc, PhD*

Contextualizing the two-decades-old debate on GM foods..	101
Genetically modified organism science.....	103
Genetics and genetic modification	103
Why do we want to use GM technology?.....	103
Genetically modified organism regulation and sustainable use in South Africa.....	104
Why are genetically modified organisms regulated?.....	104
How are genetically modified organisms regulated in South Africa?.....	104
The top five facts about South Africa's regulatory framework for genetically modified organisms.....	105
Genetically modified organism sustainability.....	107

Sustainability as the minimum standard for genetically modified organism use.....	107
Risk in context.....	108
Risk analysis as basis for sound decision-making.....	109
Local and international experience with genetically modified organism use.....	111
The local perspective.....	112
The international perspective	113
Conclusion	113
References.....	114
Further reading.....	115

CHAPTER 6.2 Genetically modified bananas for communities of the great lakes region of Africa 117

<i>Namanya Priver, PhD, Tindamanyire Jimmy, PhD, Buah Stephen, PhD, Namaganda Josephine, PhD, Kubiriba Jerome, PhD and Tushemereirwe Wilberforce, PhD</i>	
Introduction.....	117
Using biotechnology for development of banana with pest and disease resistance	118
Using biotechnology to address human nutritional deficiencies.....	119
The genetically modified development pipeline.....	120
Genes and their safety	122
Biodiversity and environmental safety	122
No unintended effects on nontarget organisms.....	123
Economics and trade implications.....	124
Partnerships, ownership, patents, and access.....	125
Regulatory aspects.....	127
Conclusion	127
Acknowledgments.....	127
References.....	128

CHAPTER 6.3 Trends in genetically modified crops development in Nigeria: issues and challenges..... 131

<i>David Adedayo Animasaun, PhD, Musibau Adewuyi Azeez, PhD, Amos Oladimeji Adubi, MSc, Felicia Adejoke Durodola, MSc and Joseph Akintade Morakinyo, PhD</i>	
Introduction.....	131
Biotechnology, genetic engineering, and genetically modified foods	132
Mutation breeding.....	134

	Nigeria as a case study	135
	Status of the genetically modified foods in Nigeria.....	136
	Genetic modification of crops by induced mutation	138
	Issues and challenges of GMFs in Nigeria.....	142
	Economic and ethics	142
	Health and environmental safety concerns.....	143
	The politics of GMOs/GMFs in Nigeria.....	144
	Intervention and outlook	145
	Conclusion	146
	References.....	146
CHAPTER 6.4	GMOs in Argentina.....	151
	<i>Moisés Burachik, PhD</i>	
	Introduction.....	151
	The Argentine case	152
	The genetically modified organisms debate	157
	Lessons learned.....	165
	References.....	166
CHAPTER 6.5	Controversial issues: Brazil case studies	173
	<i>Andre Nepomuceno Dusi, PhD, Virology, Deise Maria Fontana</i>	
	<i>Capalbo, Bs, MSc, PhD, Food Engineering and Josias Correa de</i>	
	<i>Faria, PhD, Plant Pathology</i>	
	Introduction.....	173
	Anatomy of the controversy	173
	Development of Brazilian legislation and the	
	controversy.....	174
	Research impact on GM development in Brazil: private	
	and public contributions.....	175
	Public perception.....	176
	Public perception and the GM bean case study	177
	Controversy on commercialization of GM bean	179
	Final remarks.....	179
	References.....	180
CHAPTER 7	GM crops and conventional or organic agriculture	
	coexistence in EU regulation.....	183
	<i>Luc Bodiguel</i>	
	From coexistence to GM definition.....	183
	From GM crops regulation to coexistence measures.....	186
	Another conception for crops coexistence: local governance ..	188
	The end of the debate on coexistence?	190
	References.....	192

CHAPTER 8 The impact of GM crops on agriculture 195

Alan H. Schulman

Introduction.....	195
The economic impact of GM crops and their traits for farmers and consumers	196
Impact of GM crops on farming practice	199
Impact of GM varieties on crop genetic diversity	201
Impact on biodiversity of noncrop species.....	202
Impact of GMs on food production, marketing, and distribution of agricultural products	204
Impact of GMs in Europe, a special case	204
Concluding comments	206
Prospects: the impact of gene editing	207
References.....	209

PART 2 Irradiated food

CHAPTER 9 What is the benefit of irradiation compared to other methods of food preservation? 217

Anuradha Prakash, PhD

Introduction.....	217
Pasteurization and sterilization.....	218
Thermal	218
Nonthermal.....	220
Chemical.....	221
Irradiation	221
Insect disinfection	223
Thermal	223
Nonthermal.....	224
Chemical.....	224
Irradiation	225
Inhibition of sprouting.....	226
Chemical.....	226
Irradiation	227
Conclusion	227
References.....	229

CHAPTER 10 Irradiation kills microbes: can it do anything harmful to the food?..... 233

Franco Pedreschi, PhD and María Salomé Mariotti-Celis, PhD

Introduction.....	233
Current status of food irradiation in the world	234

	Irradiation for food safety and quality	236
	Future of food irradiation	239
	Conclusions	239
	Acknowledgments	240
	References	240
CHAPTER 11	Can irradiated food have an influence on people's health?	243
	<i>Joseph John Bevelacqua, PhD and S.M. Javad Mortazavi, PhD</i>	
	Introduction	243
	History of concerns about food irradiation	245
	Safety issues of food irradiation technologies	246
	Do current regulations guarantee our safety?	248
	How did fear of radiation affect public perception about food irradiation?	250
	Why are not irradiated foods a real health concern?	252
	Summary	255
	References	255
	Further reading	257
CHAPTER 12	Safety of irradiated food	259
	<i>Jun Nishihira, MD, PhD</i>	
	Background	259
	History of food irradiation	260
	Present situation	260
	Safety of food irradiation	262
	Appropriate irradiation dose	263
	Attitudes of consumers to irradiated food	263
	Overall conclusion	265
	Perspectives	265
	References	266
	Further reading	267
CHAPTER 13	Novel processing technologies: facts about irradiation and other technologies	269
	<i>Ronald F. Eustice</i>	
	Introduction	269
	Resistance to "new" technology	269
	Risk versus benefits	270
	Food irradiation	270
	What is food irradiation?	271
	Why irradiate food?	271

How is food irradiated?	271
Safety of irradiated foods	272
Labeling of irradiated food	272
Consumer acceptance of irradiated food	272
Organizations that support irradiation	273
Food safety	273
Insect control	274
Availability and acceptance of irradiated foods	275
Resistance to “new” technologies	275
Pasteurization	275
Antivaccination movement	277
Antichlorination movement	278
World’s safest food supply; safe enough?	278
Irradiation: a powerful tool to make food safer	278
Consumer acceptance of foods that have been irradiated ...	279
Future directions	280
Barriers to acceptance	283
Conclusions	283
Defining moments in food safety	284
References	285
CHAPTER 14 Conclusions	287
<i>Veslemøy Andersen</i>	
Recommended literature	288
Index	291
