Chapter 1	Theory of copolymerization.	1
1.1	Introduction.	1
1.2	Copolymer composition equation and reactivity ratio.	4
1.2.1	Copolymer composition equation.	4
1.2.2	Types of copolymerization.	7
	(a) Ideal.	7
	(b) Alternating.	9
1.2.3	Instantaneous composition of feed and polymer.	9
1.2.4	Evaluation of monomer reactivity ratios.	13
1.2.5	Integration of the copolymer composition equation.	16
1.3	Free radical copolymerization.	17
1.3.1	Introduction.	17
1.3.2	Equation of synthesis of free radicals.	18

	Page
1.4 Ionic copolymerization.	19
1.4.1 Anionic copolymerization.	19
1.4.2 Cationic copolymerization.	23
Chapter 2 Experimental aspects.	27
2.1 Purity requirements : General introduction	27
2.2 Purification of materials used.	35
2.2.1 Purification of monomers.	35
(a) Purification of styrene and methyl methacrylate.	35
(b) Purification of acrylo- nitrile.	38
2.2.2 Purification of diluents and solvents.	38
(a) Purification of benzene.	38
(b) Purification of n-heptane.	40
(c) Purification of nitroben- zene.	40
(d) Preparation of sodium- potassium alloy.	40

	Page
2.2.3 Purification of Initiators/	
Catalyst reagents.	40
(a) Purification of benzoyl peroxide.	40
(b) Purification of n-butyl chloride.	41
2.3 Copolymerization techniques.	41
2.3.1 Free radical copolymerization.	41
(a) Calculation of the monomer mixture composition for free radical copolymerization.	41
(b) Free radical copolymerization procedure.	44
2.3.2 Anionic copolymerization.	45
(a) Preparation of initiator (n-butyl lithium).	45
(b) Anionic copolymerization procedure.	47
2.3.3 Cationic copolymerization.	48

	Page
2.4 Instrumental techniques.	49
2.4.1 Infrared analysis of polymers.	49
(a) Introduction.	49
(b) Quantitative determination of the methyl acrylate content of methyl acrylate/ methyl methacrylate copo- lymer by Infrared spectro- scopy.	55
2.4.2 Nuclear magnetic resonance analysis of polymer.	57
(a) Introduction.	57
(b) NMR analysis of polymers.	58
(c) Quantitative analysis of acrylic copolymers from the NMR spectrum.	62
Chapter 3 Results and Discussions	66
3.1 Copolymerization of methyl methacrylate and styrene.	66
3.1.1 Infrared results relating to methyl methacrylate-styrene copolymers.	66

(a) Methyl methacrylate-styrene copolymers from free radical copolymerization.	66
(b) Methyl methacrylate-styrene copolymers from anionic copolymerization.	68
(c) Methyl methacrylate-styrene copolymers from cationic copolymerization.	71
3.1.2 NMR results relating to methyl methacrylate-styrene copolymer.	75
(a) NMR spectra of copolymers from free radical copolymeri- zation.	75
(b) NMR spectra of copolymers from anionic copolymerization.	81
(c) NMR spectra of copolymers from cationic copolymerization.	82
3.2 Copolymerization of acrylonitrile and styrene.	83
3.2.1 Preparation by free radical copoly- merization.	83

	Page
(a) Introduction.	83
(b) Experimental details.	83
3.2.2 IR results relating to acrylo- nitrile-styrene copolymer.	86
3.2.3 NMR results relating to acry- lonitrile-styrene copolymer.	90
Conclutions	93
Appendixes	97

Abbreviations and Symbols

ACN	Acrylonitrile
AlCl_3	Aluminium trichloride
AZBN	Azo-bis-isobutyronitrile
BuLi	Butyl lithium
$^{\circ}\text{C}$	Degree Celcius
f_1, f_2	Mole fractions in monomer feed
F_1, F_2	Mole fractions in copolymer
IIR	Isobutylene-isoprene bubber
IR	Infrared
IUPAC	International Union for Pure and Chemistry
M	Monomer
M.	Monomer radical
MMA	methyl methacrylate
NMR	Nuclear magnetic resonance
r_1, r_2	Monomer reactivity ratios
ST	Styrene
T	Temperature
