PART I QUALITY AND SAFETY ISSUES

Chapter 1 Quality Assurance and Regulation of the Blood Industry and Safety Issues in the Blood Bank, 1

SECTION 1: REGULATORY AND ACCREDITING AGENCIES FOR QUALITY AND SAFETY, 2

- US Food and Drug Administration, 3
- Centers for Medicare and Medicaid Services, 3
- AABB, 3
- International Society of Blood Transfusion, 4
- Other Safety Regulations, 4

SECTION 2: QUALITY ASSURANCE AND GOOD MANUFACTURING PRACTICES, 5

- Quality Assurance, 5
- Good Manufacturing Practices, 5
- Components of a Quality Assurance Program, 6

SECTION 3: SAFETY, 13

- Standard Precautions, 13
- The Blood Bank Safety Program, 13
- Safety Program Fundamentals, 13

PART II FOUNDATIONS: BASIC SCIENCES AND REAGENTS

Chapter 2 Immunology: Basic Principles and Applications in the Blood Bank, 23

SECTION 1: CHARACTERISTICS ASSOCIATED WITH ANTIGEN–ANTIBODY REACTIONS, 24

- General Properties of Antigens, 24
- General Properties of Antibodies, 25
- Comparison of IgM and IgG Antibodies, 28
- Primary and Secondary Immune Response, 30
- Antigen–Antibody Reactions, 30

SECTION 2: CHARACTERISTICS ASSOCIATED WITH RED CELL ANTIGEN–ANTIBODY REACTIONS, 32

- Red Cell Antigens, 33
- Red Cell Antibodies, 34
- Immunohematology: Antigen–Antibody Reactions in vivo, 34

Immunohematology: Antigen–Antibody Reactions in Vitro, 37

SECTION 3: APPLICATION OF RED CELL ANTIGEN–ANTIBODY REACTIONS FOR ROUTINE TESTING IN IMMUNOHEMATOLOGY, 41

- Introduction to Routine Testing in Immunohematology, 41
- Sources of Antigen for Testing, 42
- Sources of Antibody for Testing, 43
- Routine Testing Procedures in the Immunohematology Laboratory, 43

Chapter 3 Blood Banking Reagents: Overview and Applications, 49

SECTION 1: INTRODUCTION TO BLOOD BANKING REAGENTS, 50

- Regulation of Reagent Manufacture, 50
- Reagent Quality Control, 51

SECTION 2: COMMERCIAL ANTIBODY REAGENTS, 52

- Polyclonal Versus Monoclonal Antibody Products, 52
- Reagents for ABO Antigen Typing, 55
- Reagents for D Antigen Typing, 56
- Reagent Control, 56

SECTION 3: REAGENT RED CELLS, 57

- A₁ and B Red Cells for ABO Serum Testing, 57
- Screening Cells, 58
- Antibody Identification Panel Cells, 59

SECTION 4: THE ANTIGLOBULIN TEST AND REAGENTS, 59

- Principles of the Antiglobulin Test, 59
- Sources of Error in Antiglobulin Testing, 62
- Antiglobulin Reagents, 64

SECTION 5: ANTIBODY POTENTIATORS AND LECTINS, 66

- Low-Ionic-Strength Saline, 66
- Polyethylene Glycol, 67
- Enzymes, 67
- Bovine Serum Albumin, 67
- Lectins, 68

SECTION 6: ALTERNATIVE METHODS TO THE TUBE TEST, 68

- Microplate Testing Methods, 68
- Gel Technology Method, 69
- Solid-Phase Testing Methods, 69

Chapter 4 Blood Banking Genetics, 76**SECTION 1: BLOOD GROUP SYSTEM GENETICS, 77**

- What Is a Blood Group System?, 77
- Basic Genetic Terminology, 79

SECTION 2: POPULATION GENETICS, 85

- Combined Phenotype Calculations, 85
- Relationship Testing, 85

SECTION 3: MOLECULAR GENETIC TECHNIQUES, 87

- Application of Molecular Genetics to Blood Banking, 87
- Polymerase Chain Reaction, 87
- Polymerase Chain Reaction–Based Methods for Human Leukocyte Antigen Typing Procedures, 89
- Polymerase Chain Reaction–Based Methods for Red Cell Typing Procedures, 91
- Testing for Blood Groups, 92

PART III OVERVIEW OF THE MAJOR BLOOD GROUPS**Chapter 5 ABO and H Blood Group Systems and Secretor Status, 99****SECTION 1: HISTORICAL OVERVIEW OF ABO BLOOD GROUP SYSTEM, 100****SECTION 2: ABO AND H BLOOD GROUP SYSTEM ANTIGENS, 100**

- General Characteristics of ABO Antigens, 100
- Inheritance and Development of A, B, and H Antigens, 101
- ABO Subgroups, 104

SECTION 3: GENETIC FEATURES OF ABO BLOOD GROUP SYSTEM, 106**SECTION 4: ABO BLOOD GROUP SYSTEM ANTIBODIES, 107**

- General Characteristics of Human Anti-A and Anti-B, 108
- Human Anti-A,B from Group O Individuals, 109
- Anti-A1, 109

SECTION 5: ABO BLOOD GROUP SYSTEM AND TRANSFUSION, 109

- Routine ABO Phenotyping, 109

- Selection of ABO-Compatible Red Blood Cells and Plasma Products for Transfusion, 110

SECTION 6: RECOGNITION AND RESOLUTION OF ABO DISCREPANCIES, 111

- Technical Considerations in ABO Phenotyping, 111
- Sample-Related ABO Discrepancies, 111

SECTION 7: SPECIAL TOPICS RELATED TO ABO AND H BLOOD GROUP SYSTEMS, 121

- Classic Bombay Phenotype, 121
- Secretor Status, 121

Chapter 6 Rh Blood Group System, 129**SECTION 1: DISCOVERY OF THE D ANTIGEN, 130****SECTION 2: GENETICS, BIOCHEMISTRY, AND TERMINOLOGY, 130**

- Genetics and Biochemistry of the Rh Blood Group System, 130
- Rh Terminologies, 131
- Determining the Genotype From the Phenotype, 134

SECTION 3: ANTIGENS OF THE Rh BLOOD GROUP SYSTEM, 134

- D Antigen, 134
- D Antigen Typing, 136
- The Weak D Phenotype, 137
- Partial D Phenotypes, 138
- Significance of Testing for Weak D, 139
- Other Rh Blood Group System Antigens, 140
- Unusual Phenotypes, 141

SECTION 4: Rh ANTIBODIES, 142

- General Characteristics, 142
- Clinical Considerations, 142

SECTION 5: LW BLOOD GROUP SYSTEM, 143

- Relationship to the Rh Blood Group System, 143
- LW Antigens and Antibodies, 143

Chapter 7 Other Red Cell Blood Group Systems, Human Leukocyte Antigens, and Platelet Antigens, 152**SECTION 1: WHY STUDY OTHER BLOOD GROUP SYSTEMS?, 153**

- Chapter Organization, 154

SECTION 2: KELL BLOOD GROUP SYSTEM, 155

- Characteristics and Biochemistry of Kell Antigens, 155

Genetics of the Kell Blood Group System, 157
 Characteristics of Kell Antibodies, 157

SECTION 3: Kx BLOOD GROUP SYSTEM, 158

Kx Antigen and Its Relationship to the Kell
 Blood Group System, 158
 The McLeod Phenotype, 159
 The McLeod Syndrome, 160

SECTION 4: DUFFY BLOOD GROUP SYSTEM, 160

Characteristics and Biochemistry of Duffy
 Antigens, 160
 Genetics of Duffy Blood Group System, 161
 Characteristics of Duffy Antibodies, 161
 Duffy System and Malaria, 162

SECTION 5: KIDD BLOOD GROUP SYSTEM, 162

Characteristics and Biochemistry of Kidd
 Antigens, 162
 Genetics of the Kidd Blood Group System, 163
 Characteristics of Kidd Antibodies, 163

SECTION 6: LUTHERAN BLOOD GROUP SYSTEM, 164

Characteristics and Biochemistry of Lutheran
 Antigens, 165
 Genetics of the Lutheran Blood Group System, 165
 Characteristics of Lutheran Antibodies, 165

SECTION 7: LEWIS BLOOD GROUP SYSTEM, 166

Characteristics and Biochemistry of Lewis
 Antigens, 166
 Inheritance of Lewis System Antigens, 167
 Characteristics of Lewis Antibodies, 168

SECTION 8: I BLOOD GROUP SYSTEM AND i ANTIGEN, 169

I and i Antigens Facts, 169
 Biochemistry of I and i Antigens, 169
 Serologic Characteristics of Autoanti-I, 170
 Disease Association, 170

SECTION 9: THE P1PK AND GLOBOSIDE BLOOD GROUP SYSTEMS, 170

P1PK Blood Group System: P1, P^k, and NOR
 Antigens, 170
 Globoside Blood Group System: P Antigen, 170
 Facts: P1PK and Glob Blood Group System
 Antigens, 171
 Antigen Biochemistry, 171
 P1PK and Glob Blood Group System
 Antibodies, 173

SECTION 10: MNS BLOOD GROUP SYSTEM, 174

M and N Antigens, 174
 S and s Antigens, 174
 Genetics and Biochemistry, 174
 Antibodies of the MNS Blood Group System, 175

SECTION 11: MISCELLANEOUS BLOOD GROUP SYSTEMS, 177

SECTION 12: HUMAN LEUKOCYTE ANTIGEN (HLA) SYSTEM AND PLATELET ANTIGENS, 178

Human Leukocyte Antigens, 178
 Platelet Antigens, 182

PART IV ESSENTIALS OF PRETRANSFUSION TESTING

Chapter 8 Antibody Detection and Identification, 191

SECTION 1: ANTIBODY DETECTION, 192

Antibody Screen, 192
 Autocontrol and Direct Antiglobulin Test, 194
 Potentiators and Alternative Methods in Antibody
 Screen and Identification Procedures, 194
 Importance of Patient History, 195

SECTION 2: ANTIBODY IDENTIFICATION, 195

Initial Antibody Identification Panel, 195
 Panel Interpretation: Single Antibody
 Specificity, 196
 Multiple Antibodies, 199
 Antibodies to High-Incidence Antigens, 202
 Antibodies to Low-Incidence Antigens, 203
 Enhancing Weak IgG Antibodies, 204
 Antibodies Formerly Known as High-Titer,
 Low-Avidity Antibodies, 205
 Cold Alloantibodies, 206
 Neutralization Techniques, 206

SECTION 3: AUTOANTIBODIES AND AUTOIMMUNE HEMOLYTIC ANEMIA, 207

Cold Autoantibodies and Cold Autoimmune
 Hemolytic Anemia, 208
 Warm Autoantibodies and Warm Autoimmune
 Hemolytic Anemia, 212
 Drug-Induced Autoantibodies, 216
 Antibody Therapies Problematic in Serologic
 Tests, 217

Chapter 9 Compatibility Testing, 225

History of Blood Transfusion, 226

SECTION 1: PRINCIPLES OF THE CROSSMATCH, 227

What Is a Crossmatch?, 227
 Principles of Crossmatch Testing, 227
 Standards and Regulations Governing the
 Crossmatch, 228
 Crossmatch Procedures, 228
 Limitations of Crossmatch Testing, 230
 Problem Solving Incompatible Crossmatches, 230

SECTION 2: PRINCIPLES OF COMPATIBILITY TESTING, 231

Overview of Steps in Compatibility Testing, 231

SECTION 3: COMPATIBILITY TESTING SPECIAL TOPICS, 237

Urgent Transfusions, 237

Selection of Blood Products After Non-Group-Specific Transfusion, 238

Pretransfusion testing For Non-Red Blood Cell Products, 239

Blood Inventory Management, 239

Introduction to Patient Blood Management, 240

Chapter 10 Blood Bank Automation for Transfusion Services, 246**SECTION 1: INTRODUCTION TO AUTOMATION IN IMMUNOHEMATOLOGY, 246**

Benefits and Barriers of Automated Instruments, 246

SECTION 2: MEETING THE LABORATORY'S AUTOMATION NEEDS, 248

Vendor Assessment, 249

Base Technology Assessment, 249

Instrument Assessment, 249

SECTION 3: AUTOMATED TESTING TECHNOLOGY AND SYSTEMS, 250

Automated Systems for Solid-Phase Red Cell Adherence Assays, 251

Automated Systems for Solid-Phase Red Cell Assays, 253

Automated Systems for Gel Technology Assays, 256

PART V CLINICAL CONSIDERATIONS IN IMMUNOHEMATOLOGY**Chapter 11 Adverse Complications of Transfusions, 262****SECTION 1: OVERVIEW OF ADVERSE REACTIONS TO TRANSFUSION, 263**

National Hemovigilance Model, 263

Recognition of a Transfusion Reaction, 263

SECTION 2: CATEGORIES OF TRANSFUSION REACTIONS, 264

Hemolytic Transfusion Reactions, 264

Delayed Serologic Transfusion Reactions, 268

Febrile Nonhemolytic Transfusion Reactions, 268

Allergic Transfusion Reactions, 269

Transfusion-Related Acute Lung Injury, 270

Transfusion-Associated Graft Versus Host Disease, 272

Bacterial Contamination of Blood, 273

Transfusion-Associated Circulatory Overload, 274

Transfusion Hemosiderosis (Iron Overload), 274

Citrate Toxicity, 275

Posttransfusion Purpura, 275

SECTION 3: EVALUATION AND REPORTING OF A TRANSFUSION REACTION, 276

Transfusion Reaction Investigation, 276

Records and Reporting of Transfusion Reactions And Fatalities, 278

Chapter 12 Hemolytic Disease of the Fetus and Newborn, 286**SECTION 1: ETIOLOGY: HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN, 287****SECTION 2: OVERVIEW: HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN, 287**

Rh Hemolytic Disease of the Fetus and Newborn, 288

ABO Hemolytic Disease of the Fetus and Newborn, 289

Alloantibodies Other Than Anti-D Causing HDFN, 290

SECTION 3: PREDICTION: HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN, 290

Maternal History, 291

Antibody Titration, 291

Ultrasound Techniques, 291

Amniocentesis, 292

Cordocentesis, 294

Fetal Genotyping, 294

SECTION 4: POSTPARTUM TESTING, 294

Postpartum Testing of Infants and Mothers, 294

SECTION 5: PREVENTION OF HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN, 295

Antepartum Administration of Rh Immune Globulin, 296

Postpartum Administration of Rh Immune Globulin, 297

SECTION 6: TREATMENT OF HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN, 299

In Utero Treatment, 299

Postpartum Treatment, 299

Selection of Blood and Compatibility Testing for Exchange Transfusion, 300

PART VI BLOOD COLLECTING AND TESTING**Chapter 13 Donor Selection and Phlebotomy, 308****SECTION 1: DONOR SCREENING, 309**

Blood Donors, 309

Donor Registration and Donor Identification, 309
 Educational Materials and Donor Consent, 310
 Health History Interview, 311
 Physical Examination, 317

SECTION 2: PHLEBOTOMY, 318

Identification, 318
 Bag Labeling, 318
 Arm Preparation and Venipuncture, 319
 Adverse Donor Reactions, 321
 Postdonation Instructions and Care, 322

SECTION 3: SPECIAL BLOOD COLLECTION, 322

Autologous Donations, 322
 Directed Donations, 323
 Apheresis, 323
 Therapeutic Phlebotomy, 325

Chapter 14 Testing of Donor Blood, 330

SECTION 1: OVERVIEW OF DONOR BLOOD TESTING, 331

Required Testing on Allogeneic and Autologous Donor Blood, 331
 Transfusion-Transmitted Infection and Relevant Transfusion-Transmitted Infection, 331

SECTION 2: SEROLOGIC TESTING OF DONOR UNITS, 332

ABO and D Phenotype, 332
 Antibody Screen, 333

SECTION 3: INFECTIOUS DISEASE ASSAYS, 333

Principles of Testing, 333
 Serologic Testing, 334
 Nucleic Acid Testing, 336
 Quality Control, 337

SECTION 4: VIRAL AND BACTERIAL TRANSMITTED DISEASES AND SCREENING TESTS, 337

Syphilis, 337
 Donor Screening Tests for Syphilis, 338
 Hepatitis Viruses, 338
 Donor Screening Tests for Hepatitis, 340
 Human Retroviruses, 341

SECTION 5: INSECT VECTOR TRANSMITTED DISEASES AND SCREENING TESTS, 343

West Nile Virus, 343
 Chagas Disease, 344
 Zika Virus, 345
 Babesia, 345

SECTION 6: OTHER TESTING PERFORMED ON DONOR BLOOD, 346

Cytomegalovirus, 346
 Bacterial Contamination of Blood Components, 347

SECTION 7: IDENTIFYING RISKS, 347

Recipient Tracing (Look-Back), 347
 Emerging Infectious Disease Agents, 347

PART VII BLOOD COMPONENT PREPARATION AND TRANSFUSION THERAPY

Chapter 15 Blood Component Preparation and Therapy, 352

SECTION 1: BLOOD COLLECTION AND STORAGE, 353

Storage lesion, 354
 Anticoagulant-preservative solutions, 355
 Red cell additive solutions, 355
 Platelet additive solutions, 357
 Rejuvenation solution, 357
 Pathogen reduction technology, 357

SECTION 2: BLOOD COMPONENT PREPARATION, 357

Manufacture of blood components, 357
 Whole blood, 360
 Red blood cell components, 360
 Platelet components, 365
 Plasma components, 368
 Apheresis Granulocytes, 370

SECTION 3: DISTRIBUTION AND ADMINISTRATION, 371

Product labeling, 371
 Storage and transportation, 373
 Administration of blood components, 374

Chapter 16 Transfusion Therapy in Selected Patients, 380

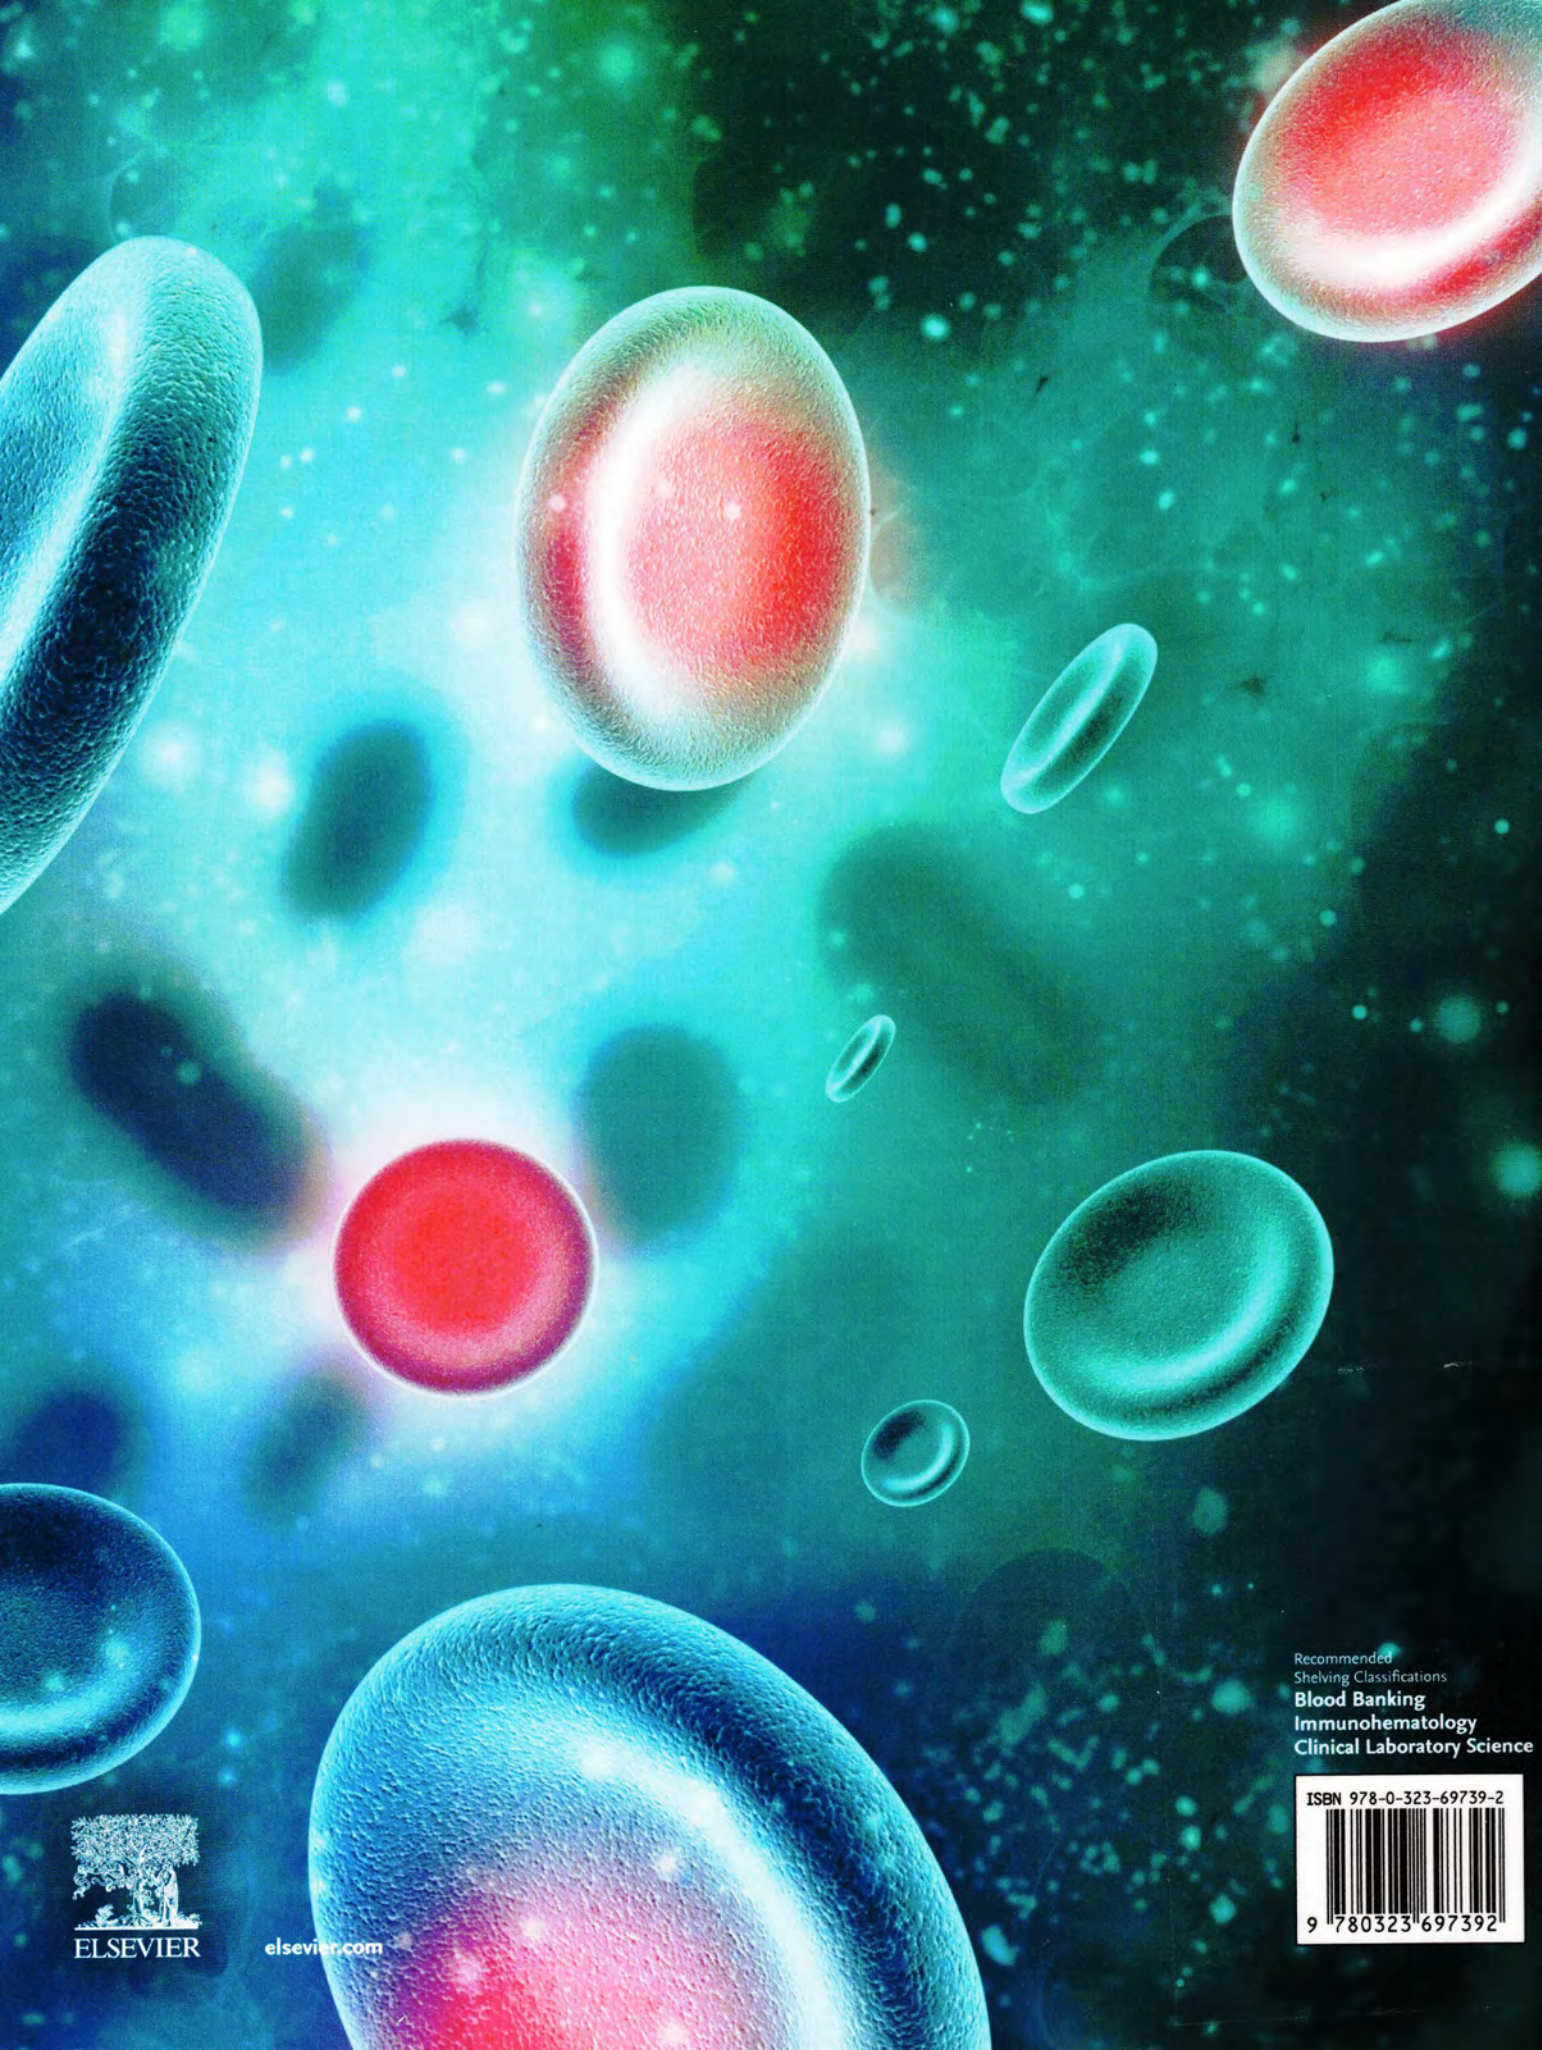

SECTION 1: TRANSFUSION PRACTICES, 381

Massive Transfusion Protocol, 381
 Cardiac Surgery, 383
 Neonatal and Pediatric Transfusion Issues, 383
 Transplantation, 385
 Therapeutic Apheresis, 389
 Oncology, 391
 Chronic Renal Disease, 391
 Hemolytic Uremic Syndrome and Thrombotic Thrombocytopenic Purpura, 392
 Anemias Requiring Transfusion Support, 393
 Hemostasis and Hemostatic Disorders, 394
 Alternatives to Transfusion, 398

Answers to Study Questions, 404

Glossary, 405
