Preface, vi

Contributors, viii

## Section 1: Foundational Knowledge for Pediatric Physical Therapy Practice

### 1 Evidenced-Based Decision-Making in Pediatric Physical Therapy, 2

*Joseph Schreiber and Robert J. Palisano*

Evidence-Based Physical Therapist Practice, 2

*Methodological Quality of Individual Research Studies, 7*

Application of Evidence Into Practice, 7

International Classification of Functioning, Disability, and Health, 8

APTA Guide to Physical Therapist Practice, 9

*Patient/Client Management Model, 9*

*Examination, 9*

*Evaluation, 10*

*Diagnosis, 10*

*Prognosis, 10*

*Intervention, 10*

*Outcomes, 10*

Knowledge Translation, 11

Clinical Reasoning, 11

Summary, 12

### 2 Social Determinants of Health and Pediatric Health Care, 15

*Kim Nixon-Cave, Kathryn C. Nesbit, and Senobia Crawford*

Background Information, 15

*Biopsychosocial Influence on Child Development and the Provision of Health Care, 15*

*Social Determinants of Health, 17*

*Health Equity, 19*

*Health Disparities, 19*

*Disparities Related to Early Childhood, 19*

*Disparities in Pediatric Physical Therapy, 20*

*Culture and Cultural Responsiveness, 21*

*Race and Racism, 22*

*Implicit Bias, 24*

*Racial Microaggression, 24*

*Trauma and Child Health, 24*

*Toxic Stress and Childhood, 25*

*Trauma-Informed Care, 27*

Foreground Information, 27

*Clinical Decision-Making and Social Determinants of Health, 27*

*Optimizing Health Outcomes: Screening, 29*

*Family-Centered Care, 29*

*Social Determinants: Barriers and Mitigating Strategies to Optimize Therapy Outcomes, 29*

*Case Scenario: Preterm Infant, 31*

*Ethnic and Racial Health Disparities, 31*

*Examination, 33*

*Evaluation, 34*

*Goals and Plan of Care, 34*

*Intervention, 34*

*Outcomes, 35*

Summary, 35

### 3 Measurement, 39

*Robin L. Dole and Joseph Schreiber*

Introduction, 39

Measurement Principles, 40

*Norm Versus Criterion-Referenced Outcome Measures, 40*

*Test Development, 40*

*Psychometric Properties, 41*

Computer and Technology-Aided Measures, 42

Analysis and Interpretation, 42

*Screening and Prediction, 43*

*Determining Difference, 43*

*Evaluating Change, 44*

Selection, 44

Reporting and Sharing Results, 45

Case Illustrations of Analysis and Interpretation of Examination Data, 45

*Case 1, 45*

*Screening and Prediction—How Likely Is It That Sophia Will Go on to Have Motor Impairment? Should Intervention Be Provided? 45*

*Eligibility Decisions—Is Sophia's Development Different Enough for Her Age to Warrant Initiation and Continuation of Early Intervention Services? 45*

*Evaluation Over Change of Time—How Has Sophia's Motor Function Changed Over Time? What Has Been the Result of Intervention? 45*

*Case 2, 47*

*Initial Outpatient Exam, 47*

*Clinical Decision Following 6-Month Episode of Care, 47*

*Age 6–8: Physical Therapy Follow-Up, 49*

*Age 14: Outpatient, 49*

### 4 Motor Development and Control, 54

*Regina T. Harbourne and Stacey C. Dusing*

Theoretical Background: Perspectives Leading to Understanding the Basics of How and Why Motor Skills Change Over Time, 54

*Neural-Maturational Theories, 56*

*Cognitive Theories, 58*

*Developmental Cognitive Theories, 58*

*Motor-Learning Cognitive Theory, 59*

*Dynamic Systems, 60*

*Neuronal Group Selection Theory, 60*

*Embodied Mind Concept, 61*

*Perception-Action Theory, 62*

*Ecological Theory, 62*

*Theory Summary, 62*

Current Framework for Developmental Intervention, 63

*Factors External to the Nervous System, 63*

*Anthropometrics, Body Mass, and Nutrition, 63*

*Musculoskeletal System Factors, 63*

*Cultural Differences/Influences on Motor Skill Development, 63*

*Task Demands, 64*

*Internal Child Factors (Related to the Nervous System), 64*

*Cognitive and Behavioral Factors, 64*

*Sensory Factors, 64*

Variables of Motor Control That Influence Development, 65

*Current Hypotheses of Motor Control, 65*

*Postural Control, 66*

*Reaching, 67*

*Locomotive Control, 70*

Details of Development: When and What Skills Are Acquired, 70

*Early Development: First Year of Life, 71*

*Early Neonatal Movement, 71*

*Neonatal and Infant Reflexes, 71*

*Functional Head Control, 72*

*Anticipatory Control of the Hand During Grasping, 78*

*Becoming Mobile, 78*

*Motor Development Beyond the First Year, 81*

*Functional Motor Skills and Activity Levels in Preschoolers, 81*

- Early School Years, 82
  - Steps in Motor Skill Development for Older Children, 82
  - Reaching Strategies in School-Age Children, 82
  - Maturation of Precision Grip and Load Force Control in Preschool and School-Age Children, 83
  - The Role of Play in Development, 84
  - Examples of Multifactorial Nature of Motor Development: Pulling It All Together, 85
  - Summary, 85
  - Acknowledgment, 85
- 5 Motor Learning: Application of Principles to Pediatric Rehabilitation, 91**  
*Andrew M. Gordon, Richard A. Magill, and Ginny Paleg*
- Introduction, 91
  - Motor-Learning Principles, 91
    - Basic Assumptions, 91
      - General Influences on the Learning of Motor Skills, 91
      - Categories and Taxonomies of Motor Skills, 91
      - Types of Knowledge Acquired During Learning, 92
      - Stages of Learning, 93
    - Practice Conditions Considerations, 93
      - Generalization: From the Clinic to the Everyday Experience, 93
      - Presenting Instructions About How to Perform a Skill: Demonstration and Verbal Instructions, 94
    - Enhancing Performance Expectancies and Autonomy During Practice, 95
    - Presenting Feedback During Practice, 95
      - Feedback About Errors Versus Correct Aspects of Performance, 96
      - Selecting the Skill or Activity Component for Feedback, 96
      - Frequency of Giving Feedback, 96
    - Practice Structure, 96
    - Practice Variability, 96
      - Organizing Practice Variability, 97
      - Practice Specificity, 97
      - Massed and Distributed Practice, 97
      - Whole and Part Practice, 98
    - Reducing Difficulty of a Skill, 98
    - Mental Practice, 99
  - Motor Learning in Typically Developing Children, 99
    - Children Are Not Simply Little Adults, 99
      - Feedback Schedules, 100
      - Types of Practice Schedules, 100
      - Learning Occurs Over Considerable Time and Practice, 100
  - Motor Learning in Pediatric Rehabilitation, 100
    - Practice Makes Better, 101
    - Motor Learning-Based Approaches to Rehabilitation, 103
      - Constraint-Induced Therapy, 104
      - Unconstraining the Constraint: Bimanual Training, 105
      - Noninvasive Brain Stimulation, 105
      - Examples of Other Motor Learning-Based Approaches, 105
      - Salience of Motor Activities, 106
  - Considerations, 107
  - Summary, 107
  - Case Scenarios in eBook, 108
- 6 Musculoskeletal Development and Adaptation, 112**  
*Kathryn C. Hickey Lucas, Sally Patterson Le Cras, and Linda P. Lowes*
- Introduction, 112
  - Muscle Histology and Development, 112
    - Muscle-Tendon Unit Structure and Function, 113
  - Force and Length Adaptations in the Muscle-Tendon Unit, 114
    - Adaptations of Spastic Muscle, 114
    - Bone Histology and Development, 115
    - Skeletal Adaptations, 119
  - Bone Mineralization, 120
  - Development of the Lower Extremity, 121
    - Hip Development, 121
    - Knee Development, 122
  - Ankle and Foot Development, 122
  - Long-Term Effects of Atypical Musculoskeletal Development, 123
  - Musculoskeletal Examination and Measurement, 123
    - Range-of-Motion Examination, 123
    - Strength Examination, 124
  - Effects of Interventions on the Musculoskeletal System, 124
    - Stretching, 124
    - Strengthening, 126
    - Weight-Bearing, 126
  - Summary, 127
- 7 Physical Fitness During Childhood and Adolescence, 131**  
*Jean L. Stout*
- Health, Physical Activity, and Physical Fitness, 131
    - Definition of Physical Fitness, 132
    - Cardiopulmonary Response to Exercise, 133
      - Cardiac Output, 133
        - Arteriovenous Difference and Hemoglobin Concentration, 133
      - Arterial Blood Pressure, 134
      - Vital Capacity, 134
      - Respiratory Rate, 134
      - Blood Lactate, 134
    - Review of Tests of Physical Fitness, 134
      - Physical Best Program, 134
      - FITNESSGRAM Program, 135
      - National Children, Youth, and Fitness Study I and II, 135
      - Presidential Youth Fitness Program (Replacement for President's Challenge Youth Fitness Test), 135
      - Brockport Physical Fitness Test, 135
    - Comparison of Tests, 135
  - Components of Physical Fitness, 135
    - Cardiorespiratory Endurance, 135
      - Criterion Measure, 135
      - Laboratory Measurement, 136
      - Developmental Aspects of Cardiorespiratory Endurance, 137
      - Measurement in the Field, 137
      - Standards by Age, 137
      - Physical Activities, 138
      - Response to Training, 138
      - Assessment of Cardiorespiratory Endurance in Children With Disabilities, 138
    - Muscular Strength and Endurance, 139
      - Criterion Measure and Laboratory Measurement, 140
      - Developmental Aspects of Muscular Strength and Endurance, 140
      - Measurement in the Field, 141
      - Standards by Age, 141
      - Physical Activities, 141
      - Response to Training, 141
      - Assessment of Muscular Strength and Endurance in Children With Disabilities, 142
    - Flexibility, 144
      - Criterion Measure, 144
      - Laboratory Measurement and Developmental Aspects of Flexibility, 144
      - Measurement in the Field, 145
      - Standards by Age, 145
      - Physical Activities, 145
      - Assessment of Flexibility in Children With Disabilities, 145
    - Body Composition, 145
      - Criterion Measure, 146
      - Laboratory Measurement, 146
      - Developmental Aspects of Body Composition, 146
      - Measurement in the Field, 147
      - Standards by Age, 147
      - Response to Training, 147
      - Assessment of Body Composition in Children With Disabilities, 147

- Conditioning and Training, 148
  - Fitness Components and Training in Children*, 148
    - Cardiorespiratory Endurance, 148
    - Muscular Strength and Endurance, 148
  - Principles of Training, 149
    - Specificity, 150
    - Intensity, 150
    - Frequency, 150
    - Duration, 150
    - Progression, 150
  - Conditioning in Children With Disabilities, 150
    - Cerebral Palsy, 150
    - Cystic Fibrosis, 151
    - Duchenne Muscular Dystrophy, 151
    - Obesity, 151
- Summary, 151

## 8 Gait: Development and Analysis, 159

Jean L. Stout

- Development of Gait, 159
  - Neurologic Factors, 159
  - Biomechanical Factors, 160
  - Determinants of Walking, 160
  - Age-Related Changes in Gait, 160
    - Birth to Age 9 Months, 160
    - 9–15 Months, 161
    - 18–24 Months, 162
    - 3–3.5 Years, 163
    - 6–7 Years, 163
- Components of Gait and Gait Analysis, 163
  - Temporal Measurement Definitions and Common Terms, 164
  - Kinematics, 164
  - Kinetics, 165
  - Electromyography, 167
- Kinematics, Kinetics, and Electromyography in Normal Gait, 167
  - Sagittal Plane, 168
  - Coronal Plane, 173
  - Transverse Plane, 175
  - Energy Expenditure, 175
- Use of Gait Analysis in Assessing Impairments, 176
  - Outcomes Assessment, 176
  - Guidelines for Referral, 176
  - Assessing Gait Impairments, 176
  - Common Gait Deviations of Children With Cerebral Palsy, 177
    - Bony Deformity, 177
    - Inadequate Range of Motion and Spasticity, 177
    - Weakness, 179
- Summary, 180

## SECTION 2: Management of Musculoskeletal Conditions

### 9 Juvenile Idiopathic Arthritis, 185

Janjaap van der Net, Paul J.M. Helders Sr., and Tim Takken

- Role of the Therapist, 185
- Background Information, 187
  - Diagnosis and Classification, 187
    - Incidence and Prevalence, 188
    - Origin and Pathogenesis, 188
    - Pharmacologic Management, 189
- Prognosis, 190
- Body Function and Structure, 190
  - Joint Structure and Function, 190
  - Muscular Structure and Function, 192
  - Growth Disturbances and Postural Abnormalities, 192
  - Physical Fitness: Health- and Performance-Related Fitness, 193
  - Chronic Pain and Fatigue, 193

- Activity and Participation Restrictions, 193
  - Self-Care and Participation, 193
- Foreground Information, 194
  - Body Function and Structure, 194
    - Physical Therapy Examination, 194
    - Pain Examination, 194
    - Joint and Muscle Examination, 194
    - Physical Fitness Examination, 196
  - Activity, 196
    - Activity and Participation, 198
- Physical Therapy Intervention, 198
  - Body Function and Structures, 198
    - Management of Joint Health, 198
    - Muscle Strength, 200
    - Aerobic Capacity, 200
    - Anaerobic Capacity, 200
    - Pain and Fatigue, 200
    - Activity and Participation, 200
      - Encouraging Active Healthy Living and Physical Literacy, 200
      - Self-Care Activities, 201
      - Functional Mobility, 201
      - Issues Related to School, 201
      - Recreational Activities, 202
- Orthopedic Surgery and the Role of the Physical Therapist, 202
- Summary, 202
- Acknowledgment, 202
- Case Scenarios in eBook, 202

### 10 Spinal Conditions, 205

Michael D. Allen, Suzanne Green, and Robyn B. McHugh

- Development of the Spine, 205
- Scoliosis, 205
  - Background Information, 205
    - Detection and Clinical Examination, 205
    - Terminology, 207
  - Idiopathic Scoliosis, 207
    - Origin, Incidence, and Pathophysiology, 207
  - Congenital Scoliosis, 209
    - Origin, Incidence, and Pathophysiology, 209
    - Thoracic Insufficiency Syndrome, 209
  - Foreground Information, 210
    - Surgical Interventions, 210
    - Nonsurgical Interventions, 211
  - Outcomes and Natural History for Persons With Adolescent Idiopathic Scoliosis, 214
  - Neuromuscular Scoliosis, 214
    - Background, 214
    - Foreground Information, 215
- Kyphosis, 215
  - Background and Foreground Information, 215
  - Congenital Kyphosis, 216
  - Postural Roundback, 216
  - Scheuermann Disease, 216
    - Intervention for Scheuermann Disease, 216
- Lordosis, 217
  - Background and Foreground Information, 217
- Spondylolysis and Spondylolisthesis, 217
  - Background Information, 217
  - Foreground Information, 218
    - Clinical Presentation, 218
    - Nonsurgical Intervention, 218
    - Surgical Intervention, 218
- Low Back Pain, 219
  - Background and Foreground, 219
    - Physical Therapy Management, 219
- Summary, 219
- Case Scenario in eBook, 219

## 11 Congenital Muscular Torticollis and Cranial Deformation, 227

Barbara Sargent, Colleen Coulter, and Sandra L. Kaplan

Background Information, 227

Anatomy of the Sternocleidomastoid Muscle and Cranium, 227

Etiology and Pathophysiology of CMT, 228

Etiology and Pathophysiology of CD, 229

Combined Conditions of CMT and CD, 229

Methods of Classification for CMT, 230

Methods of Classification for CD, 230

CMT Changes in Body Structure and Function, Activity, and Participation, 231

CD Changes in Body Structure and Function, Activity, and Participation, 232

Foreground Information, 234

Routine Education of Parents to Prevent and Screen for CMT and CD, 234

Physical Therapy Management of CMT and CD, 234

Screening and Differential Diagnosis for Confounding Conditions, 235

Physical Therapy Examination, 236

Physical Therapy Classification and Prognosis for

Clinical Management, 238

Conservative Interventions for CMT and CD, 239

Supplemental Physical Therapy Interventions With Evidence for CMT, 243

Cranial Remolding Therapy and Positioning Devices for CD, 244

Nonconservative Interventions for CMT, 245

Anticipated Outcomes and Discharge Criteria, 245

Summary, 246

Case Scenario in eBook, 246

## 12 Arthrogryposis Multiplex Congenita, 251

Maureen Donohoe

Background Information, 251

Incidence and Etiology, 251

Diagnosis, 251

Clinical Manifestations, 251

Medical Management, 253

Foreground Information, 255

Body Structures and Functions, 255

Diagnosis and Problem Identification, 255

Problem Identification by the Team, 255

Physical Therapy in Infancy, 257

Examination, 257

Development, Strength, and Mobility, 258

Stretching and Splinting, 259

Physical Therapy in the Preschool Period, 260

Examination, 260

Goals, 261

Intervention Strategies, 261

Stretching, 261

Orthotics, 261

Physical Therapy During the School-Age and

Adolescent Periods, 262

Examination, 262

Goals, 262

Intervention Strategies, 263

Transition to Adulthood, 263

Intervention Strategies, 265

Summary, 265

Case Scenarios in eBook, 265

## 13 Osteogenesis Imperfecta, 270

Maureen Donohoe

Background Information, 270

Classification, 270

Osteogenesis Imperfecta Type I, 270

Osteogenesis Imperfecta Type II, 270

Osteogenesis Imperfecta Type III, 270

Osteogenesis Imperfecta Type IV, 270

Osteogenesis Imperfecta Type V, 270

Pathophysiology, 274

Medical Management, 274

Impairment, 275

Diagnosis and Problem Identification, 275

Foreground Information, 276

Examination, Evaluation, and Intervention, 276

Infancy, 276

Preschool Period, 281

School-Age and Adolescence, 283

Transition to Adulthood, 284

Case Scenario in eBook, 284

## 14 Neuromuscular Disease: Muscular Dystrophies and Spinal Muscular Atrophy, 288

Allan M. Glanzman and Jennifer Jones

Role of the Physical Therapist, 288

Physical Therapy Examination and Evaluation, 288

Diseases of the Muscle, 289

Dystrophin-Associated Proteins and Muscular Dystrophy, 289

Duchenne Muscular Dystrophy, 289

Background Information, 289

Foreground Information, 291

Becker Muscular Dystrophy, 298

Background Information, 298

Foreground Information, 298

Congenital Muscular Dystrophy, 298

Background Information, 298

Foreground Information, 299

Childhood-Onset Facioscapulohumeral Muscular Dystrophy, 300

Background Information, 300

Foreground Information, 300

Infancy and Preschool-Age Period, 300

School-Age Period, 300

Transition to Adulthood, 300

Myotonic Dystrophy, 300

Background Information, 300

Foreground Information, 301

Infancy, 301

School-Age Period, 301

Transition to Adulthood, 301

Emery-Dreifuss Muscular Dystrophy, 301

Spinal Muscular Atrophy, 302

Background Information, 302

Spinal Muscular Atrophy (Type I), 303

Background Information, 303

Foreground Information, 304

Spinal Muscular Atrophy (Type 2), 305

Background Information, 305

Foreground Information, 306

Spinal Muscular Atrophy (Type 3), 307

Background Information, 307

Foreground Information, 308

Summary, 308

Case Scenarios in eBook, 308

Acknowledgments, 308

## 15 Limb Deficiencies and Amputations, 315

Colleen P. Coulter, Rebecca Hernandez, Meg Stanger, and Brian J. Giavedoni

Background Information, 315

Congenital Limb Deficiencies, 315

Classification, 315

Origin, 315

Levels of Congenital Limb Deficiency, 316

Upper and Lower Extremity Congenital Deficiencies, 317

Acquired Amputations, 320

- Trauma, Disease, and Vascular, 320
  - Sarcoma of Bone, Bone Tumors, 320
  - Surgical Options in the Management of Congenital and Acquired Limb Deficiencies, 321
    - Amputation, 321
    - Amputation to Revise Congenital Limb Deficiencies to Improve Function, 322
    - Amputation in the Treatment of Bone Tumors, 322
    - Rotationplasty, 323
    - Limb Reconstruction/Lengthening/Limb Sparing/Guided Growth, 324
    - Limb Replantation, 325
    - Osseointegration, 326
    - Outcomes: Comparison of Surgical Options, 326
  - Phantom Limb Sensations, 326
  - Prosthetic Management, 326
    - General Principles of Management, 326
    - Upper Extremity Prosthetics, 326
    - Lower Extremity Prosthetics, 328
  - Foreground Information, 332
    - Physical Therapy Examination and Intervention for the Child With a Limb Deficiency or an Acquired Amputation, 332
      - Infancy and Toddler Period, 333
      - Preschool and School-Age Period, 335
      - Adolescence and Transition to Adulthood, 337
    - Bilateral Upper Extremity and Multiextremity Limb Loss, 338
  - Summary, 339
  - Case Scenarios in eBook, 340
  - Acknowledgment, 340
- 16 Orthopedic Conditions, 344**
- Sally Patterson Le Cras and Kathryn C. Hickey Lucas*
- Upper Extremity Conditions, 344
    - Shoulder Dislocation and Subluxation, 344
    - Nursemaid's Elbow, 344
    - Upper Extremity Fractures, 344
  - Lower Extremity Conditions, 345
    - Lower Extremity Examination, 345
    - Other Diagnostic Tests, 345
  - Leg Length Discrepancy, 346
    - Examination for Leg Length Discrepancy, 346
    - Orthotics and Shoe Lifts, 347
    - Shortening the Long Limb, 347
    - Lengthening the Short Limb, 347
  - Torsional Conditions: In-Toeing and Out-Toeing, 349
    - Clinical History, 350
    - Torsional or Rotational Profile, 350
      - Foot Progression Angle, 350
      - Hip Rotation, 350
      - Thigh-Foot Angle and Transmalleolar Axis, 353
    - Forefoot Alignment, 354
  - In-toeing, 354
  - Femoral Antetorsion, 355
  - Internal Tibial Torsion, 356
  - Metatarsus Adductus, 356
  - Out-Toeing, 357
    - Hip External Rotation Contractures and Femoral Retroversion, 357
  - External Tibial Torsion, 357
  - Flatfoot, 357
- Hip Conditions, 357
- Developmental Dysplasia of the Hip, 357
    - Goals for Developmental Dysplasia of the Hip Intervention, 360
    - Socioeconomic Risk Factors for Poor Outcomes of Developmental Dysplasia of the Hip, 363
- Legg-Calvé-Perthes Disease, 363
- Slipped Capital Femoral Epiphysis, 364
- Knee Conditions, 366
- Measurement of the Hip-Knee-Ankle Angle, 366
  - Knee Alignment, 366
  - Genu Varum, 366
  - Genu Valgum, 367
  - Genu Recurvatum, 367
  - Discoid Lateral Meniscus, 368
  - Osgood-Schlatter Syndrome, 368
  - Osteochondritis Dissecans, 368
- Ankle and Foot Conditions, 369
- Ankle and Foot Examination, 369
  - Flatfoot, 370
    - Flexible Flatfoot, 370
    - Rigid Flatfoot, 371
  - Congenital Talipes Equinovarus, 371
  - Tarsal Coalition, 372
  - Freiberg Disease, 372
  - Köhler Disease, 373
  - Sever Disease, 373
  - Accessory Ossicles, 373
- Gait Conditions, 373
- Idiopathic Toe Walking, 373
  - The Insidious Limp, 375
- Achondroplasia, 376
- Ehlers-Danlos Syndromes, 377
- Vascular Malformations, 379
- Infectious Conditions, 379
- Acute Osteomyelitis, 379
  - Acute Septic Arthritis, 380
  - Chronic Recurrent Multifocal Osteomyelitis, 380
- Occult Fractures, 380
- Growing Pains, 380
- Summary, 380
- Case Scenarios in eBook, 381
- Acknowledgment, 381

## 17 Sports Injuries in Children, 387

*Mark Paterno, Laura Schmitt, Catherine Quatman-Yates, and Kathryn Lucas*

- Background Information, 387
  - Incidence of Injury, 387
    - Anatomic Location, 387
