**Often times families ask for carryover suggestions for what they can do with their kids at home between their speech therapy appointments. This guide was developed to do just that. It will provide you with ideas on how to incorporate your child's speech and language goals into daily routine activities.**

**Preschool and Kindergarten teachers will find that they can take simple exercises and turn them into functional communication activities. Many of the ideas shared in this book will teach you how to turn receptive tasks into expressive ones to encourage increased communication.**

**Not only is this book beneficial to parents and teachers, but it can also help anyone working with young children who need to strengthen their communication or simply need a boost of confidence during daily speech exchanges. You will find the activities to be unique and engaging.**
